- (g) it would be in the best interests of the Australian Grains Industry for GRDC to cease to fund the LEIFS Project so as to enable GRDC to fund one or more proposed research projects that may, in the opinion of GRDC, be of exceptional benefit to the industry; or
- (h) the Delivery Partner is prevented by a Force Majeure Event from undertaking its obligations under this Agreement for a period of 60 days or more.

16.3 Automatic termination

This Agreement terminates automatically on:

- (a) the termination or expiry of the Collaboration Agreement; or
- (b) the Delivery Partner ceasing to be a party to the Collaboration Agreement.

 - (i) GRDC, the Delivery Partner and any third party that owns LEIFS Project Outputs under clause 9.3, retain:
 - (1) their respective ownership proportions of LEIFS Project Outputs, recalculated according to each Party's Contribution actually provided to the LEIFS Project at the date of termination; and
 - (2) any Beneficial Interest in the LEIFS Project Outputs at the date of termination,
 - (ii) termination will not affect the enforceability of any rights or obligations accrued under this Agreement which survive termination;
 - (iii) from the date of termination, each Party will cease to be liable to make any of its further Contributions to the LEIFS Project; and
 - (iv) any licences of Background Material, Third Party Material and copyright in LEIFS Project Milestone Reports and other rights and obligations of the Parties remain in force to the extent they are expressed to survive termination of this Agreement.

- (c) If this Agreement is terminated by GRDC under clause 16.2, then (in addition to clause 16.4(a)) GRDC is obligated to reimburse the Delivery Partner for any reasonable additional costs incurred and substantiated by the Delivery Partner as a result of the early termination of the LEIFS Project.
- (d) On expiry or termination of this Agreement (for any reason), the Delivery Partner must, unless instructed otherwise by GRDC in writing:
 - (i) provide to GRDC all completed or in-progress LEIFS Project Outputs, together with instructions as to the steps required for completion of that work;
 - (ii) provide a summary of the status of the LEIFS Project as at the termination date;
 - (iii) repay to GRDC any GRDC Cash Contributions not already spent or irrevocably committed for expenditure;

required in order to facilitate the reduction in scope of the LEIFS Project. Following receipt of such notice, GRDC may negotiate with the Delivery Partner to agree such variations and the date on which the reduction in LEIFS Project scope takes effect.

- (c) If the Delivery Partner does not provide notice under clause 16.5(b) within the specified time period, the scope of the LEIFS Project will be reduced in accordance with GRDC's notice on and from the effective date of that notice.
- (d) Any election by GRDC to reduce the scope of the LEIFS Project or agree to variations proposed by the Delivery Partner under this clause 16.5 is at GRDC's absolute discretion and does not prejudice its right to terminate or any other rights or remedies available to GRDC under this Agreement or the Collaboration Agreement.

Approved Repository Requirements

Requirement	Explanatory Notes
Fit-for-purpose	The purpose of the repository must be to facilitate long-term storage of research data and to provide access to it.
Discovery and identification	The repository: <ul style="list-style-type: none"> • provides a publicly facing web-based search tool for data discovery; • assigns a persistent identifier to each dataset and provides it as a URI as part of the associated metadata; • provides API endpoints for metadata harvesting that return metadata according to the RIF-CS metadata standard.
Technical infrastructure	The repository must operate on reliable and stable core infrastructure that can support the expected usage load and storage requirements.
Access management, licensing, and rights	The dataset must be findable to a third party, but access by third parties can be blocked or restricted. Access to data can be granted by the custodian of the dataset. Metadata fields associated with the dataset include information on licensing and rights for use of the dataset.
Continuity of service	The repository must have a plan to ensure ongoing access to and preservation of its data and metadata, including regular backups. Disaster recovery and succession plans must be in place.
Guidance and assistance	Guidance on the use of the repository must be available in the form of both documentation for end-users, and human assistance.
Compatibility with GRDC Data Catalogue	RIF-CS metadata records exported from an Approved Repository include mandatory metadata fields as defined by GRDC, such that the metadata entry in the GRDC data catalogue is a high-quality and complete metadata record.
