AUGUST 2023

GRAINS RESEARCH UPDATE

Keith Institute, Heritage Street, Keith

9.00 am to 1.00 pm followed by lunch (doors open at 8.30 am for a 9.00 am start)

Topics

- ▶ **Emerging powdery mildew resistance challenges, how to effectively manage**
With the impact of yield loss in wheat during the 2022 season it's important to consider past lessons learnt. Join Stuart in exploring varietal resistance, control and treatment mechanisms and the economic impacts of potential yield loss associated when powdery mildew takes hold.
*Stuart Sherriff,
Tregrove
Consulting*
- ▶ **Tackling Snails: Key strategies for control and prevention**
Snails continue their march to unwanted territory and are proving a handful. Kym provides an overview of key management strategies aimed at controlling these invasive pests.
*Kym Perry,
SARDI*
- ▶ **Resistance management strategies for the redlegged earth mite in grain and pasture systems** With a cold wet winter endured, these destructive pests are back on the scene, Adriana steps us through insecticide resistance troubles and best practice management strategies for combatting these insects.
*Adriana Arturi,
Cesar Australia*
- ▶ **Nutrition strategies to mitigate yield losses following waterlogging**
This years cold wet seasonal conditions has led to a slow start and water logging challenges for growers. Malcolm provides insights into the impacts that water logging has on denitrification, leaching and the N bank.
*Malcolm
McCaskill,
Agriculture
Victoria*
- ▶ **Combatting weed resistance: best practice management for tackling stubborn ryegrass, radish, and fleabane**
Tackle the ever-persistent problem of resistant ryegrass and barley grass this season. Join Peter in discussing the region's resistance status with key insights into the control and management options available for growers.
*Peter Boutsalis,
Plant Science
Consulting*
