

ROKEWOOD
VICTORIA
THURSDAY 23
FEBRUARY 2023

GRAINS RESEARCH UPDATE

Rokewood Memorial Hall, 66 Ferrars Street

9.00 am to 1.00 pm followed by lunch (doors open at 8.30 am for a 9.00 am start)

Topics

- ▶ **Agronomics and harvestability of hyper yielding canola**
Unlock your canola crops potential this season by exploring agronomic strategies for managing hyper yielding canola. Darcy covers agronomic fundamentals and harvest best practice when managing hyper yielding canola crops.
*Darcy Warren,
FAR Australia*
- ▶ **Managing cereal diseases in high rainfall environments**
Take a proactive approach to managing the most prevalent cereal diseases in high rainfall environments. Discover how to receive the best bang for your buck from fungicides this season.
*Nick Poole,
FAR Australia*
- ▶ **Tackling sclerotinia in canola and pulses**
Discover how to best manage sclerotinia in canola and pulse crops. Kurt outlines guidelines and best management strategies for strategic use in high rainfall environments.
*Kurt Lindbeck,
NSW DPI*
- ▶ **Waterlogging - prevention is better than cure**
Identifies the key challenges around waterlogging and implications for the following year. Ashley will explore key factors that impact soil health, nutrition, and soil structure.
*Ashley Amourgis,
Southern Farming Systems*
- ▶ **Emerging strategies for long term weather forecasting**
Don't let this season catch you off guard. Jemma Pearl provides an update on emerging weather forecasting strategies. Discover the seasonal risk implications of a full soil moisture profile and how to manage them.
*Jemma Pearl,
Agriculture Victoria*
