## What's New

### Introduction

- A.1 Agronomy at a glance .....xii
- A.2 Crop overview.....xiii
- A.3 Executive summary.....xiv

## 1 Planning/Paddock preparation

- 1.1 Peanut production season plan ..... 1
  - Pre-season* .....2
  - Ground preparation*.....2
  - Week 0: planting*.....2
  - Week 1: cracking*.....2
  - Weeks 2 and 3: crop establishment* .....2
  - Weeks 4 and 5: flowering*.....2
  - Weeks 6 and 7: main flowering* .....3
  - Weeks 8 and 9: pegging* .....3
  - Weeks 10 and 11: pegging and pod-setting* .....3
  - Weeks 12 and 13: canopy closure and pod-setting* .....3
  - Weeks 14 and 15: pod-filling*.....3
  - Weeks 16 and 17: pod-filling and early maturity*.....4
  - Weeks 18 and 19: maturity and digging* .....4
  - Weeks 20 and 21*.....4
  - Harvest*.....4
  - Pre-cleaning*.....4
  - Curing*.....4
- 1.2 Paddock selection..... 5
  - 1.2.1 Rotations.....5
  - 1.2.2 Soils .....5
- 1.3 Paddock history ..... 5
  - 1.3.1 Paddock history trials.....6
  - 1.3.2 Pesticide history ..... 10
- 1.4 Benefits of peanuts as a rotation crop .....10
- 1.5 Disadvantages of peanuts as a rotation crop .....10
- 1.6 Pre-plant weed control.....10
- 1.7 Potential crop contaminants .....10
- 1.8 Seedbed requirements.....11
- 1.9 Soil moisture ..... 11
  - 1.9.1 Dryland..... 11
  - 1.9.2 Irrigation ..... 12
    - What will irrigation do?* .....12
    - Irrigation systems* ..... 12

<b>1.10</b>	<b>Yield and targets .....</b>	<b>13</b>
1.10.1	Seasonal outlook .....	15
1.10.2	Fallow moisture and double-cropping .....	15
1.10.3	Water Use Efficiency .....	15
1.10.4	Nitrogen-use efficiency .....	16
<b>1.11</b>	<b>Disease status of paddock .....</b>	<b>17</b>
<b>1.12</b>	<b>Insect status of paddock.....</b>	<b>17</b>
<b>2</b>	<b>Pre-planting</b>	
<b>2.1</b>	<b>Varietal performance and ratings yield .....</b>	<b>1</b>
2.1.1	Hi Oleic varieties .....	2
2.1.2	Short-season (early maturing) varieties.....	2
2.1.3	Yielding ability.....	3
2.1.4	Peanut breeding.....	4
	<i>Kairi</i> .....	4
	<i>Taabinga</i> .....	4
<b>2.2</b>	<b>Quality of planting seed .....</b>	<b>4</b>
2.2.1	Growing peanuts for seed .....	5
	<i>Clean land</i> .....	5
	<i>Clean machinery</i> .....	5
	<i>Irrigation</i> .....	5
	<i>Supplementary calcium</i> .....	5
	<i>Maturity</i> .....	5
	<i>Digging and threshing</i> .....	5
	<i>Drying</i> .....	6
	<i>Peanut seed contracts</i> .....	6
<b>3</b>	<b>Planting</b>	
<b>3.1</b>	<b>Seed dressings .....</b>	<b>1</b>
<b>3.2</b>	<b>Inoculation .....</b>	<b>1</b>
3.2.1	Treat inoculum well.....	2
<b>3.3</b>	<b>Germination.....</b>	<b>2</b>
<b>3.4</b>	<b>Reduced tillage .....</b>	<b>2</b>
<b>3.5</b>	<b>Time of planting.....</b>	<b>3</b>
<b>3.6</b>	<b>Seeding rate .....</b>	<b>3</b>
<b>3.7</b>	<b>Sowing depth .....</b>	<b>4</b>
<b>3.8</b>	<b>Row configuration .....</b>	<b>4</b>
<b>3.9</b>	<b>Sowing equipment .....</b>	<b>7</b>
3.9.1	Press-wheels .....	8
3.9.2	Planters.....	9
<b>4</b>	<b>Plant growth and physiology</b>	
<b>4.1</b>	<b>Botanical types .....</b>	<b>1</b>
<b>4.2</b>	<b>Growth and development.....</b>	<b>3</b>

4.2.1 Germination and emergence ..... 3

4.2.2 Vegetative growth..... 4

4.2.3 Flowering..... 5

4.2.4 Pegging..... 5

4.2.5 Pod development..... 6

4.2.6 Podfill..... 6

4.2.7 Maturity..... 7

4.3 Seed dormancy..... 8

**5 Nutrition and fertiliser**

5.1 Declining soil fertility ..... 1

    5.1.1 Soil organic matter.....1

    5.1.2 Current situation..... 4

    5.1.3 Options for reversing the decline in soil organic matter ..... 5

*Impact of fertiliser N inputs on soil* ..... 7

5.2 Nutritional requirements.....7

5.3 Soil fertility.....10

5.4 Crop removal rates .....10

5.5 Soil testing.....11

5.6 Nutrient availability and soil pH.....11

5.7 Calcium.....13

5.8 Nitrogen .....15

    5.8.1 Nitrogen loss .....17

*How nitrogen is lost*.....17

*Case study: One management strategy to reduce nitrogen losses*..... 18

5.9 Phosphorus.....18

5.10 Sulfur .....20

5.11 Potassium .....20

5.12 Boron .....22

5.13 Copper.....23

5.14 Iron .....23

5.15 Magnesium .....25

5.16 Manganese.....26

5.17 Molybdenum .....26

5.18 Zinc.....27

5.19 Cadmium management.....28

**6 Weed control**

6.1 Digging..... 2

6.2 Threshing..... 2

6.3 Drying..... 3

6.4 Management options..... 3

6.4.1	Cultivation .....	3
6.4.2	Herbicides.....	3
	<i>Grass weeds</i> .....	3
	<i>Broadleaf weeds</i> .....	3
	<i>Weed peanuts</i> .....	4
<b>7</b>	<b>Insect control</b>	
<b>7.1</b>	<b>Types of insect pests .....</b>	<b>1</b>
	<i>Foliage feeders</i> .....	1
	<i>Sucking insects</i> .....	1
<b>7.2</b>	<b>Growth stages.....</b>	<b>2</b>
7.2.1	Pre-emergence.....	2
7.2.2	Emergence to first flowering .....	2
7.2.3	Flowering, pegging and podfill.....	3
7.2.4	Mature crops .....	3
<b>7.3</b>	<b>Damage caused by pests .....</b>	<b>3</b>
	<i>Soil insects and pod damage</i> .....	3
<b>7.4</b>	<b>Management of insect pests .....</b>	<b>3</b>
<b>7.5</b>	<b>Major insect pests of peanuts.....</b>	<b>4</b>
7.5.1	Aphids (Aphididae).....	4
7.5.2	Cluster caterpillar ( <i>Spodoptera litura</i> ).....	5
7.5.3	Cutworms ( <i>Agrotis</i> spp.).....	6
7.5.4	Lucerne seed web moth ( <i>Etiella behrii</i> ).....	7
7.5.5	False wireworms ( <i>Gonocephalum</i> spp. and <i>Pterohelaeus</i> spp.).....	8
7.5.6	<i>Helicoverpa punctigera</i> and <i>H. armigera</i> .....	9
7.5.7	Lucerne leafhopper ( <i>Austroasca alfalfae</i> ).....	10
7.5.8	Vegetable leafhopper ( <i>Austroasca viridigrisea</i> ).....	11
7.5.9	Pineapple mealybug ( <i>Dysmicoccus neobrevipes</i> ).....	12
7.5.10	Mirids (Miridae), green and brown ( <i>Creontiades</i> sp.).....	13
7.5.11	Peanut mite ( <i>Paraplonobia</i> spp.).....	14
7.5.12	Two-spotted mite ( <i>Tetranychus urticae</i> ).....	15
7.5.13	Redshouldered leaf beetle ( <i>Monolepta australis</i> ) .....	16
7.5.14	Silverleaf whitefly ( <i>Bemisia tabaci</i> , type B).....	17
7.5.15	Storage insects.....	18
7.5.16	Thrips (Thysanoptera).....	19
7.5.17	Whitefringed weevil ( <i>Graphognathus leucoloma</i> ) .....	20
7.5.18	Cane whitegrubs ( <i>Lepidiota</i> spp.).....	21
7.5.19	Peanut whitegrubs ( <i>Heteronyx piceus</i> ).....	22
7.5.20	Wireworms (click beetles, Elateridae).....	23
<b>8</b>	<b>Nematode management</b>	
<b>8.1</b>	<b>Types of nematodes.....</b>	<b>2</b>
8.1.1	Root-lesion nematodes ( <i>Pratylenchus brachyurus</i> ).....	2

8.1.2 Root-knot nematodes (*Meloidogyne hapla*) ..... 2

**8.2 Effects of cropping history on nematode status ..... 3**

**9 Diseases**

**9.1 Damage caused by disease ..... 1**

**9.2 Management of disease ..... 1**

9.2.1 Crop rotation ..... 2

9.2.2 Fungicide program for high risk areas ..... 2

**9.3 Disease symptoms ..... 2**

9.3.1 Causes of seedlings dying (or poor emergence) ..... 3

*Soil-borne fungi including Aspergillus niger (Aspergillus crown rot) and Rhizopus arrhizus* ..... 3

*Damaged seed* ..... 4

9.3.2 Causes of leaves with brown spots ..... 4

*Early and late leaf spot (caused by Cercospora arachidicola and Cercosporidium personatum)* ..... 4

*Rust (caused by Puccinia arachidis)* ..... 6

*Net (or web) blotch (caused by Didymosphaeria arachidicola)* ..... 8

*Pepper spot and scorch (caused by Leptosphaerulina arachidicola)* ..... 9

*Physiological spotting* ..... 9

9.3.3 Leaves with colour variations ..... 10

*Capsicum chlorosis virus (CaCV)* ..... 10

*Peanut mottle virus (PMV)* ..... 11

*Tomato spotted wilt virus (TSWV)* ..... 12

*Verticillium wilt (caused by Verticillium dahliae)* ..... 13

9.3.4 Branch wilting or plant death ..... 15

*Sclerotinia blight (caused by Sclerotinia sclerotiorum and S. minor)* ..... 15

*Cylindrocladium black rot (CBR) (caused by Cylindrocladium crotalaria)* ..... 16

*White mould (caused by Sclerotium rolfsii)* ..... 18

*Collar rot (caused by Lasiodiplodia theobromae)* ..... 19

*Aspergillus crown rot (caused by Aspergillus niger)* ..... 21

*Charcoal rot (caused by Macrophomina phaseolina)* ..... 22

*Rhizoctonia stem rot (caused by Rhizoctonia solani)* ..... 23

9.3.5 Ill-thrift ..... 24

*Root-lesion nematodes (Pratylenchus brachyurus)* ..... 24

*Root-knot nematodes (Meloidogyne hapla)* ..... 25

9.3.6 Pods damaged at harvest ..... 26

*Soil insects* ..... 26

*Pod-rotting fungi, including Lasiodiplodia theobromae, Pythium spp. and Rhizoctonia solani* ..... 26

*Aflatoxin-producing fungi (Aspergillus flavus and A. parasiticus)* ..... 26

**9.4 Soil-borne diseases ..... 28**

**9.4.1 Neocosmospora vasinfecta ..... 29**

**9.5 Emerging diseases ..... 29**

9.5.1 Peanut smut (*Thecaphora frezii*) ..... 29

9.5.2 Peanut kernel shrivel ..... 29

**10 Plant growth regulators and canopy management**

**11 Crop desiccation/spray out**

**12 Harvest**

12.1 Hull scrape test ..... 1

12.2 When to dig ..... 2

    12.2.1 Peg strength ..... 2

    12.2.2 Disease ..... 2

    12.2.3 Weather conditions ..... 2

    12.2.4 Soil conditions ..... 3

    12.2.5 Area to be harvested ..... 3

12.3 Digging and inverting ..... 3

12.4 Windrowing ..... 4

12.5 Threshing ..... 5

12.6 Wet harvest issues and management ..... 5

**13 Storage**

13.1 How to dry and store peanuts on-farm ..... 1

    13.1.1 Aflatoxin ..... 2

    13.1.2 Off-flavour contamination ..... 2

13.2 Pre-cleaning ..... 2

13.3 Storage pests ..... 2

**14 Environmental issues**

14.1 Climate ..... 1

14.2 Temperature ..... 1

    14.2.1 Risk management for frost ..... 4

    14.2.2 The changing nature of frost in Australia ..... 4

14.3 Rainfall ..... 4

14.4 Daylength ..... 5

14.5 Soils ..... 5

**15 Marketing**

15.1 Consumption ..... 1

    15.1.1 Food value ..... 2

15.2 World production ..... 2

15.3 Contract options ..... 3
