## CONTENTS

---

## Contents

### A Introduction

A.1 Crop overview.....	xiii
A.2 Malting barley and malt .....	xv

### 1 Planning/Paddock preparation

1.1 Agronomy tips at a glance.....	1
1.2 Paddock selection .....	1
1.3 Paddock rotation and history .....	2
1.3.1 Long fallow disorder .....	2
1.4 Benefits of barley as a rotation crop.....	4
1.5 Disadvantages of cereals as a rotation crop .....	4
1.6 Fallow weed control.....	5
1.6.1 Double-knock strategies.....	5
Awnless barnyard grass .....	6
Flaxleaf fleabane .....	8
Feathertop Rhodes grass.....	10
Windmill grass.....	11
1.7 Fallow chemical plant-back effects .....	12
1.8 Seedbed requirements .....	13
1.9 Soil moisture .....	14
1.9.1 Dryland .....	14
Technologies to support decision-making .....	14
Subsoil constraints.....	15
Effect of strategic tillage.....	16
1.9.2 Irrigation .....	16
1.10 Yield and targets .....	16
1.10.1 Variety yield comparisons .....	16
1.10.2 Seasonal outlook .....	17
1.10.3 Fallow moisture.....	18
HowWet?.....	18
1.10.4 Water-use efficiency.....	19
Ways to increase yield.....	20
The French-Schultz approach .....	20
1.10.5 Nitrogen-use efficiency .....	22
1.10.6 Double-crop options .....	23
1.11 Disease status of paddock .....	23
1.11.1 Soil testing for disease.....	23
1.11.2 Cropping history effects.....	23
1.12 Nematode status of paddock .....	24
1.12.1 Nematode testing of soil .....	24
1.12.2 Effects of cropping history on nematode status.....	24
1.13 Insect status of paddock .....	25
1.13.1 Insect sampling of soil .....	25
Soil sampling by spade.....	25
Germinating seed bait technique .....	26
Recognising soil insects.....	26
Detecting soil-dwelling insects .....	26
1.14 Mouse management .....	26

### 2 Pre-planting

2.1 Varietal performance and ratings yield .....	1
2.1.1 Selecting barley varieties .....	1
2.1.2 Yielding ability and GRDC-funded National Variety Trials (NVT) .....	2
2.1.3 Maturity .....	4
2.1.4 Malting and other quality traits .....	4

Malting varieties .....	4
Food-grade varieties .....	5
Feed varieties .....	5
2.1.5 Other varietal traits.....	5
2.1.6 Varieties.....	6
2.2 Planting seed quality .....	10
2.2.1 Seed size.....	10
2.2.2 Seed germination and vigour.....	10
Disease.....	11
2.2.3 Seed storage.....	11
2.2.4 Safe rates of fertiliser sown with the seed .....	12

### 3 Planting

3.1 Seed treatments .....	1
3.1.1 Choice of seed or in-furrow treatments .....	2
3.2 Time of sowing .....	2
3.3 Targeted plant population .....	3
3.3.1 Seeding rates .....	3
3.3.2 Field establishment.....	3
3.3.3 Plant population .....	4
3.4 Calculating seed requirements .....	5
3.5 Row spacing .....	6
3.6 Sowing depth.....	6
3.7 Sowing equipment.....	7
3.7.1 Using pre-emergent herbicides with different seeding equipment .....	8

### 4 Plant growth and physiology

4.1 Germination and emergence .....	1
4.1.1 Germination.....	1
Phase 1: Water absorption (GS01*).....	1
Phase 2: Activation (GS03).....	1
Phase 3: Visible germination (GS05–GS07).....	1
4.1.2 Emergence (GS07) .....	1
Coleoptile formation.....	2
4.2 Factors affecting germination and emergence .....	2
4.2.1 Dormancy.....	2
4.2.2 Moisture .....	2
4.3 Effect of temperature, photoperiod and climate on plant growth and physiology.....	3
4.3.1 Temperature .....	3
Germination.....	3
Emergence .....	3
Establishment.....	3
4.3.2 Oxygen.....	4
4.3.3 Seed quality .....	4
4.3.4 Coleoptile length.....	4
4.3.5 Nutrition .....	5
Nitrogen .....	5
Phosphorus .....	5
4.4 Plant growth stages .....	6
4.4.1 Plant growth stages .....	6
4.4.2 Zadoks Cereal Growth Stage Key.....	6

### 5 Nutrition and fertiliser

5.1 Organic matter .....	1
5.1.1 Current situation.....	3
5.1.2 Options for reversing the decline in soil organic matter .....	3
Impact of fertiliser N inputs on soil.....	4

5.2	Balanced nutrition.....	4
5.2.1	Paddock records.....	5
5.3	Increasing complexity of northern region soils.....	5
5.4	Understanding soil pH .....	6
	<i>Soil pH in calcium chloride</i> .....	7
	<i>Soil pH in water</i> .....	7
5.5	Hierarchy of crop fertility needs.....	8
5.6	Crop removal rates .....	8
5.7	Nitrogen .....	9
5.7.1	Nitrogen supply and grain protein content .....	9
5.8	Nitrogen volatilisation and denitrification.....	11
5.8.1	Nitrogen requirements .....	13
5.9	Current general in-crop nutritional levels for nitrogen .....	14
5.10	Phosphorus.....	17
5.11	Sulfur.....	18
5.12	Potassium .....	19
5.13	Deep placed phosphorus, sulfur and potassium .....	20
5.14	Current general pre-plant nutritional levels for zinc and micronutrients.....	20
5.15	Nutritional deficiencies .....	20
5.16	Soil testing .....	21
5.16.1	Rules of thumb.....	22
5.17	Plant and/or tissue testing for nutrition levels .....	22
5.18	Nutrition effects on the following crop.....	23
5.19	Paddock nutrition .....	24

## 6 Weed control

6.1	Planning your weed control strategy .....	1
6.2	Herbicide resistance .....	2
6.2.1	Be a WeedSmart farmer.....	5
6.2.2	Ten ways to weed out herbicide resistance.....	6
6.3	Harvest weed seed control.....	7
6.4	Other non-chemical weed control .....	7
6.5	Crop competition .....	8
6.6	Herbicides explained .....	9
6.6.1	Residual v. non-residual.....	9
6.6.2	Post-emergent and pre-emergent .....	10
6.7	Pre-emergent herbicides .....	10
	<i>Benefits</i> .....	10
	<i>Practicalities</i> .....	11
6.7.1	Avoiding crop damage from residual herbicides .....	12
	<i>What are the issues?</i> .....	12
	<i>Which herbicides are residual?</i> .....	12
	<i>How do herbicides break down?</i> .....	13
	<i>How can I avoid damage from residual herbicides?</i> .....	13
	<i>Group B: Sulfonylureas</i> .....	13
	<i>Group B: Triazolopyrimidines (sulfonamides)</i> .....	14
	<i>Group B: Imidazolinones</i> .....	14
	<i>Group C: Triazines</i> .....	14
	<i>Group D: Trifluralin</i> .....	14
	<i>Group H: Isoxazoles</i> .....	14
	<i>Group I: Phenoxys</i> .....	14
	<i>Group K: Metolachlor</i> .....	14
	<i>Group K: Pyroxasulfone</i> .....	15
6.8	In-crop herbicides: knock downs and residuals.....	15
6.9	Herbicide tolerance ratings.....	15
6.10	Post-emergent herbicide damage .....	16

6.11 Selective sprayer technology.....	16
<i>Special permit</i> .....	17

## 7 Insect control

7.1 Aphids.....	1
7.1.1 Oat aphids ( <i>Rhopalosiphum padi</i> ).....	1
7.1.2 Corn aphid ( <i>Rhopalosiphum maidis</i> ) .....	2
7.1.3 Rose-grain aphid ( <i>Metopolophium dirhodum</i> ).....	3
7.2 Armyworm .....	4
7.3 <i>Helicoverpa</i> spp. ( <i>Heliothis</i> ) .....	5
7.4 Blue oat mite ( <i>Penthaleus</i> spp.).....	7
7.5 Varietal resistance or tolerance.....	8
7.6 Damage caused by pests .....	8
7.7 Thresholds for control.....	9
7.8 Management of aphids.....	9
<i>Aphid population:</i> .....	10
<i>Aphid control:</i> .....	10
<i>Yield and grain quality impact:</i> .....	11
<i>Net economic benefit:</i> .....	11

## 8 Nematode management

8.1 Background .....	1
8.2 Symptoms and detection .....	2
Testing service.....	3
8.2.1 What is seen in the paddock? .....	3
8.3 Management.....	3
8.3.1 Crop Rotation.....	6
8.3.2 Sowing time .....	6
8.4 Varietal resistance or tolerance.....	8
8.4.1 Tolerance.....	9
8.4.2 Resistance .....	10
8.5 Damage caused by nematodes.....	11
8.6 Nematodes and crown rot .....	11
8.6.1 Importance of variety choice .....	12

## 9 Diseases

9.1 The disease triangle.....	3
9.2 Cereal disease after drought.....	3
9.3 Cereal disease after flood events .....	4
9.3.1 Management options .....	5
9.3.2 Strategies .....	5
9.4 Head and root diseases.....	6
9.4.1 Crown rot .....	6
<i>Damage caused by crown rot</i> .....	7
<i>Symptoms</i> .....	7
<i>Effect of sowing time</i> .....	8
<i>Crown rot phases</i> .....	9
<i>Management</i> .....	10
<i>Crop rotation</i> .....	10
<i>Inter-row sowing</i> .....	11
<i>Stubble burning</i> .....	11
<i>Varietal resistance or tolerance</i> .....	11
9.4.2 Common root rot.....	12
9.4.3 Botryosphaeria head blight (white grain disorder) .....	13
9.4.4 Fusarium head blight .....	13
<i>Symptoms</i> .....	14
<i>Identity, survival and spread</i> .....	14

<i>Management</i> .....	15
<i>Resistance</i> .....	16
<i>Seed treatment</i> .....	16
<i>Tillage</i> .....	16
<i>Crop rotation</i> .....	16
<i>Planting date</i> .....	16
<i>Fungicide</i> .....	17
9.5 Leaf diseases .....	17
9.5.1 Rusts .....	17
9.5.2 Leaf rust .....	17
9.5.3 Stripe rust .....	17
9.5.4 Stem rust .....	18
9.5.5 Key points to reduce the risk of rusts .....	19
9.6 Foliar diseases .....	20
<i>Varietal resistance or tolerance</i> .....	21
9.6.1 Damage caused in favourable conditions .....	22
9.6.2 Symptoms .....	23
9.6.3 Management options .....	23

## 10 Plant growth regulators and canopy management

10.1 Canopy management .....	1
10.1.1 Canopy management in a nutshell .....	2
10.1.2 The importance of canopy management .....	2
10.1.3 Grazing cereal crops as a management tool .....	3
10.1.4 Research on the Liverpool Plains .....	5
<i>Summary</i> .....	5
10.1.5 The commercial view .....	5
<i>Limitations of tactical nitrogen application</i> .....	6
10.2 Key stages for disease control and canopy management .....	6
10.3 Use of plant growth regulators .....	8
10.3.1 Variety-specific research .....	12

## 11 Crop dessication/spray out

### 12 Harvest

12.1 Header settings .....	1
12.2 Monitoring grain loss .....	2
12.3 Wet harvest issues and management .....	2
12.4 Fire prevention .....	4
<i>Using machinery</i> .....	4
12.4.1 Steps to preventing header fires .....	4
12.5 Receival standards .....	5
12.6 Harvest weed seed control .....	6
12.6.1 Intercepting annual weed seed .....	6
<i>Chaff carts</i> .....	7
<i>Baling</i> .....	7
<i>Windrow burning</i> .....	7
<i>Chaff grinding</i> .....	7
<i>Summary</i> .....	8
12.6.2 Harvest weed seed management in the northern grains region .....	8
<i>Background</i> .....	8
<i>Approach</i> .....	8
<i>Results</i> .....	9
<i>Implications</i> .....	11

### 13 Storage

13.1 How to store barley on-farm .....	2
13.1.1 Malt barley .....	2

13.1.2 Storage options.....	2
13.2 Hygiene.....	5
13.3 Grain protectants and fumigants .....	7
13.4 Aeration during storage .....	12
13.5 Monitoring barley .....	15

## 14 Environmental issues

14.1 Frost issues for barley.....	1
14.1.1 Frost resistance in cereals after head-emergence.....	1
14.1.2 The effect of frost damage on different growth stages—better field identification of frost damage.....	2
<i>Young crops</i> .....	2
<i>Advanced crops—not showing ears or awns</i> .....	2
<i>Advanced crops—ears or awns visible</i> .....	3
14.1.3 Field screening—varietal differences .....	4
<i>Small-scale, nationally coordinated frost trials</i> .....	4
<i>Screening diverse winter cereals for improved frost resistance</i> .....	4
<i>Screening results</i> .....	4
14.1.4 The need for a better understanding—how and when plants freeze.....	5
<i>Sowing dates</i> .....	6
14.2 Soil moisture issues for barley.....	7
14.2.1 Moisture stress.....	7
14.2.2 Waterlogging.....	7

## 15 Marketing

15.1 Markets for malting and feed barley .....	1
15.2 Marketing your crop.....	1
15.3 Malting varieties.....	2
15.3.1 Varietal selection .....	2
15.3.2 Planting and growth .....	3
15.3.3 Harvest and storage.....	4
15.4 Feed varieties.....	4
15.4.1 Planting and growth .....	5
15.4.2 Harvest and storage.....	5
15.5 Further reading .....	6
