# Contents

## Introduction

- A.1 Crop overview.....xix**
  - A.1.1 Comparative notes ..... xix
  - A.1.2 Description..... xix
  - A.1.3 Rye for human consumption ..... xxi
  - A.1.4 Rye for animal consumption..... xxii
    - Grain* ..... xxii
    - Forage*..... xxii
    - Pasture*..... xxii
- A.2 Growing regions .....xxii**
- A.3 Brief history .....xxiii**

## 1 Planning/Paddock preparation

- Key messages:*..... 1
- 1.1 Paddock selection..... 1**
  - 1.1.1 Disease ..... 1
  - 1.1.2 Soil ..... 2
    - Soil pH*..... 3
    - Management of acidic soils*..... 4
    - Cereal rye on erosion-prone soils*..... 5
    - Subsoil constraints*..... 5
    - Soil testing guide*..... 6
  - 1.1.3 Paddocks for forage cereals ..... 7
  - 1.1.4 Topography..... 7
    - Topography mediates the influence of cover crops on soil nitrate levels in row-crop agricultural systems*..... 8
- 1.2 Paddock rotation and history..... 9**
  - Allelopathic effects* ..... 11
  - 1.2.1 Rotation issues..... 12
  - 1.2.2 Long fallow disorder..... 12
- 1.3 Fallow weed control.....13**
  - 1.3.1 The green bridge .....14
  - 1.3.2 Management strategies .....14
  - 1.3.3 Stubble retention..... 15
    - Reduced erosion risk*..... 15
    - Increased soil water content*..... 16
    - Increased biological fertility of soil*..... 16
    - Management practices affecting stubble cover*.....17
- 1.4 Fallow chemical plant-back effects.....17**
  - Plant-back periods for fallow herbicides in New South Wales*..... 19
- 1.5 Seedbed requirements.....20**

- 1.5.1 Seedbed soil structural decline..... 20
- 1.5.2 Improving seedbed soil structure..... 21
- 1.6 Soil moisture ..... 22**
  - 1.6.1 Dryland..... 22
    - Rye cover crop management influences on soil water, soil nitrate and corn development..... 22*
    - Tillage practices ..... 23*
    - Tillage, microbial biomass and soil biological fertility ..... 24*
  - 1.6.2 Irrigation..... 27
    - Irrigating winter cereals in the Northern region..... 27*
- 1.7 Yield and targets ..... 28**
  - Estimating crop yields..... 29*
  - Yield Prophet®..... 30*
  - 1.7.1 Seasonal outlook ..... 31
    - Queensland..... 31*
    - New South Wales..... 31*
    - CliMate..... 32*
  - 1.7.2 Fallow moisture ..... 32
    - HowWet?..... 32*
  - 1.7.3 Water Use Efficiency ..... 33
    - Strategies to increase yield..... 34*
    - Grain yield and water use: relative performance of winter v. spring cereals in Canada..... 35*
  - 1.7.4 Nitrogen-use efficiency ..... 35
    - Environment and genotype influence on grain protein concentration of wheat and rye ..... 36*
    - Optimising nitrogen-use efficiency..... 36*
- 1.8 Disease status of paddock ..... 37**
  - 1.8.1 Soil testing for disease ..... 37
    - PreDicta B..... 37*
  - 1.8.2 Effects of cropping history..... 38
  - 1.8.3 Nematode status of paddock ..... 38
    - Effects of cropping history on nematode status..... 39*
- 1.9 Insect status of paddock..... 39**
  - 1.9.1 Insect sampling of soil ..... 39
    - Sampling methods..... 40*
  - 1.9.2 Identification..... 40
    - Insect ID: The Ute Guide..... 41*
  - 1.9.3 Effect of cropping history..... 41
- 2 Pre-planting**
  - Key messages:..... 1*
- 2.1 Cereal rye for forage..... 1**
  - 2.1.1 Cereals for grazing ..... 2
  - 2.1.2 Dual-purpose crops..... 2

	<i>New South Wales dual-purpose cereal cropping trials</i> .....	3
<b>2.1.3</b>	<b>Cover cropping</b> .....	<b>4</b>
	<i>Cover cropping to prevent wind erosion</i> .....	4
	<i>Growing cereal rye to increase carbon and prevent wind erosion</i> .....	4
	<i>Control of cover crops</i> .....	5
<b>2.2</b>	<b>Varietal performance and ratings</b> .....	<b>5</b>
<b>2.2.1</b>	<b>Identifying products for industry</b> .....	<b>5</b>
	<i>Low- and high-amylose rye</i> .....	6
	<i>Low-pentosan rye</i> .....	6
	<i>High-pentosan rye</i> .....	6
	<i>White rye</i> .....	7
	<i>High-molecular-weight glutenin rye</i> .....	7
	<i>Long-season dual-purpose rye</i> .....	7
<b>2.2.2</b>	<b>Developing products for industry</b> .....	<b>7</b>
	<i>High-pentosan rye for NSW</i> .....	7
	<i>White rye suitable for NSW</i> .....	8
	<i>Opportunities</i> .....	8
<b>2.2.3</b>	<b>Varieties</b> .....	<b>8</b>
	<i>Bevy</i> .....	8
	<i>Southern Green</i> .....	9
	<i>Vampire</i> .....	10
	<i>Ryesun</i> .....	10
	<i>Westwood</i> .....	10
<b>2.3</b>	<b>Planting seed quality</b> .....	<b>10</b>
<b>2.3.1</b>	<b>Seed germination and vigour</b> .....	<b>11</b>
	<i>Seed purity</i> .....	12
<b>2.3.2</b>	<b>Seed storage</b> .....	<b>12</b>
<b>2.3.3</b>	<b>Safe rates of fertiliser sown with the seed</b> .....	<b>12</b>
<b>3</b>	<b>Planting</b> .....	<b>1</b>
	<i>Key messages:</i> .....	1
<b>3.1</b>	<b>Inoculation</b> .....	<b>1</b>
<b>3.2</b>	<b>Seed treatments</b> .....	<b>1</b>
	<b>3.2.1 Fertiliser at seeding</b> .....	<b>2</b>
<b>3.3</b>	<b>Time of sowing</b> .....	<b>2</b>
<b>3.4</b>	<b>Targeted plant population</b> .....	<b>3</b>
	<i>Effect of seeding rate and planting arrangement on rye cover crop and weed growth in the US</i> .....	3
<b>3.5</b>	<b>Calculating seed requirements</b> .....	<b>3</b>
<b>3.6</b>	<b>Sowing depth</b> .....	<b>4</b>
<b>3.7</b>	<b>Sowing equipment</b> .....	<b>5</b>
<b>4</b>	<b>Plant growth and physiology</b> .....	<b>1</b>
	<i>Key messages:</i> .....	1
<b>4.1</b>	<b>Germination and emergence issues</b> .....	<b>3</b>

4.1.1	Dormancy.....	3
	<i>The seedbank dynamics of volunteer rye.....</i>	<i>3</i>
4.1.2	Germination.....	3
4.1.3	Emergence.....	4
<b>4.2</b>	<b>Environmental effects on plant growth and physiology.....</b>	<b>5</b>
4.2.1	Photoperiod and temperature.....	5
4.2.2	Salinity.....	5
<b>4.3</b>	<b>Plant growth stages.....</b>	<b>5</b>
4.3.1	Roots.....	7
4.3.2	Plant development: photosynthesis and maturation.....	8
4.3.3	Vegetative behaviour.....	8
	<i>Grazing.....</i>	<i>9</i>
4.3.4	Flowering and grain formation.....	10
	<i>Frost tolerance.....</i>	<i>11</i>
<b>5</b>	<b>Nutrition and fertiliser</b>	
	<i>Key messages:.....</i>	<i>1</i>
<b>5.1</b>	<b>Nutrient balance.....</b>	<b>1</b>
5.1.1	Nutrient benefits from rye.....	2
	<i>Winter cover crop effects on soil organic carbon in soil.....</i>	<i>2</i>
5.1.2	Fertiliser application.....	3
<b>5.2</b>	<b>Crop removal rates.....</b>	<b>3</b>
<b>5.3</b>	<b>Soil testing.....</b>	<b>4</b>
5.3.1	Why test soil?.....	4
5.3.2	Basic requirements.....	5
5.3.3	Types of test.....	5
<b>5.4</b>	<b>Plant and/or tissue testing for nutrition levels.....</b>	<b>5</b>
5.4.1	Why measure nutrients in plant tissues?.....	5
5.4.2	What does plant tissue analysis show?.....	6
<b>5.5</b>	<b>Nitrogen.....</b>	<b>7</b>
	<i>Accumulation and loss of nitrogen during growth and maturation of cereal rye.....</i>	<i>8</i>
	<i>Nitrate leaching under a cereal rye cover crop.....</i>	<i>8</i>
5.5.1	Nitrogen deficiency symptoms in cereals.....	9
	<i>What to look for.....</i>	<i>9</i>
	<i>What else could it be?.....</i>	<i>11</i>
<b>5.6</b>	<b>Phosphorus.....</b>	<b>11</b>
	<i>Uptake and utilisation of phosphate from iron phosphate—rye shows efficiency....</i>	<i>12</i>
5.6.1	Managing phosphorus.....	12
	<i>Symptoms.....</i>	<i>12</i>
	<i>What else could it be?.....</i>	<i>14</i>
<b>5.7</b>	<b>Sulfur.....</b>	<b>14</b>
	<i>Deficiency symptoms.....</i>	<i>15</i>
	<i>What else could it be?.....</i>	<i>16</i>

**5.8 Potassium .....16**  
*Potassium deficiency* .....17  
*What to look for* .....17  
*What else could it be?* .....19  
*Assessing potassium requirements* .....20

**5.9 Micronutrients .....20**

5.9.1 Zinc .....20  
*Deficiency symptoms* .....21  
*What else could it be?* .....22  
*Differential response of rye, triticale, bread and durum wheats to zinc deficiency in calcareous soils* .....22  
*Managing zinc deficiency:* .....23  
*Role of rye chromosomes in improvement of zinc efficiency in wheat and triticale* 24

5.9.2 Iron .....24  
*Symptoms* .....25  
*What else could it be?* .....26  
*Managing iron deficiency:* .....27

5.9.3 Copper .....27  
*Deficiency symptoms* .....27  
*What else could it be?* .....29  
*Managing copper deficiency:* .....29

5.9.4 Manganese .....30  
*Deficiency symptoms* .....30  
*What else could it be?* .....32  
*Managing manganese deficiency:* .....32

5.9.5 Aluminium .....33  
*Aluminium long-term stress differently affects photosynthesis in rye genotypes* .....33

**5.10 Nutritional deficiencies .....33**  
*Making use of the crop nutrition information available* .....33

**6 Weed control .....1**  
*Key messages* .....1

**6.1 Cereal rye: a weed suppressor .....1**

6.1.1 Allelopathic effects .....2  
*Remove cereal rye early to avoid problems from its allelopathic effect* .....2

6.1.2 Managing volunteer rye .....3  
*Prevent seed source* .....4  
*Grazing volunteer weeds* .....4  
*Cultural practices* .....4  
*Chemical control* .....5

**6.2 Integrated weed management .....5**  
6.2.1 Cover cropping for weed management .....6

**6.3 Weeds in Northern cropping systems .....7**  
6.3.1 Awnless barnyard grass .....8  
*Resistance levels* .....8

	<i>Residual herbicides (fallow and in-crop)</i> .....	9
	<i>Double-knock control</i> .....	9
<b>6.3.2</b>	<b>Flaxleaf fleabane</b> .....	<b>9</b>
	<i>Resistance levels</i> .....	10
	<i>Residual herbicides (fallow and in-crop)</i> .....	10
	<i>Knockdown herbicides (fallow and in-crop)</i> .....	11
	<i>Double-knock control</i> .....	11
<b>6.3.3</b>	<b>Feathertop Rhodes grass</b> .....	<b>11</b>
	<i>Residual herbicides (fallow and in-crop)</i> .....	12
	<i>Double-knock control</i> .....	12
<b>6.3.4</b>	<b>Windmill grass</b> .....	<b>13</b>
	<i>Resistance levels</i> .....	14
	<i>Residual herbicides (fallow and in-crop)</i> .....	14
	<i>Double-knock control</i> .....	14
<b>6.3.5</b>	<b>Annual ryegrass</b> .....	<b>14</b>
	<i>Effect of pre-emergent herbicides on ryegrass</i> .....	15
	<i>Effect of stubble on pre-emergent herbicides</i> .....	15
	<i>Effect of post emergent herbicides on ryegrass</i> .....	16
<b>6.4</b>	<b>Non-herbicide weed control in the Northern Region</b> .....	<b>16</b>
6.4.1	Strategic tillage.....	17
6.4.2	Strategic burning.....	18
6.4.3	Narrow windrow burning.....	18
6.4.4	Crop competition.....	19
6.4.5	Cover crops.....	20
<b>6.5</b>	<b>Herbicides explained</b> .....	<b>20</b>
6.5.1	Residual and non-residual.....	21
6.5.2	Post-emergent and pre-emergent.....	21
<b>6.6</b>	<b>Pre-emergent herbicides</b> .....	<b>21</b>
6.6.1	Understanding pre-emergent herbicides.....	22
6.6.2	Behaviour of pre-emergent herbicides in the soil.....	22
	<i>Top tips for using pre-emergent herbicides</i> .....	23
6.6.3	Post-sowing pre-emergent (PSPE) herbicide use.....	24
6.6.4	Incorporation by sowing (IBS).....	24
	<i>Crop safety and the use of pre-emergent residual herbicides</i> .....	24
<b>6.7</b>	<b>In-crop herbicides: knockdowns and residuals</b> .....	<b>26</b>
6.7.1	Key points for in-crop herbicide application.....	26
6.7.2	How to get the most out of post-emergent herbicides.....	27
<b>6.8</b>	<b>Conditions for spraying</b> .....	<b>27</b>
6.8.1	Minimising spray drift.....	28
	<i>Before spraying</i> .....	28
	<i>During spraying</i> .....	29
6.8.2	Types of drift.....	29
6.8.3	Factors affecting the risk of spray drift.....	29

Volatility .....	30
Minimising drift .....	31
Spray release height.....	32
Size of area treated.....	32
Capture surface.....	32
Weather conditions to avoid .....	32
<b>6.9 Herbicide tolerance ratings, NVT .....</b>	<b>33</b>
<b>6.10 Potential herbicide damage effect.....</b>	<b>34</b>
6.10.1 Avoiding crop damage from residual herbicides .....	34
<i>What are the issues?</i> .....	34
<i>Which herbicides are residual?</i> .....	34
<i>How to avoid damage from residual herbicides</i> .....	35
6.10.2 Plant-back intervals .....	35
<i>Conditions required for breakdown</i> .....	37
<b>6.11 Herbicide resistance .....</b>	<b>38</b>
6.11.1 Herbicide resistance facts .....	38
<i>Key messages</i> .....	38
<i>How does resistance start?</i> .....	42
6.11.2 General principles to avoid resistance .....	42
<i>Glyphosate-resistant weeds in Australia</i> .....	44
6.11.3 10-point plan to weed out herbicide resistance.....	45
<i>If you think you have resistant weeds</i> .....	49
<b>6.12 Monitoring weeds.....</b>	<b>50</b>
6.12.1 Tips for monitoring.....	51
<b>7 Insect control</b>	
<i>Key messages:</i> .....	1
<b>7.1 Integrated pest management .....</b>	<b>1</b>
7.1.1 Key IPM strategies for winter cereals: .....	4
<i>Insecticide choices:</i> .....	4
<i>Insecticide resistance:</i> .....	4
7.1.2 Emerging insect threats in Northern Region crops.....	5
7.1.3 Insect sampling methods .....	6
<i>Factors that contribute to quality monitoring:</i> .....	6
<i>Keeping good records</i> .....	6
<i>Sampling methods</i> .....	7
<b>7.2 Russian wheat aphid.....</b>	<b>9</b>
7.2.1 Identification.....	10
<i>What to look for</i> .....	11
7.2.2 Varietal resistance or tolerance .....	13
7.2.3 Damage caused by pest .....	13
7.2.4 Thresholds for control.....	14
7.2.5 Management of insect pest.....	14
<i>Monitoring</i> .....	14

Hygiene .....	15
Chemical control.....	15
<b>7.3 Helicoverpa spp.....</b>	<b>15</b>
7.3.1 Varietal resistance or tolerance .....	17
7.3.2 Damage caused by <i>Helicoverpa</i> .....	17
7.3.3 Thresholds for control.....	18
7.3.4 Management of <i>Helicoverpa</i> .....	18
Chemical control.....	18
Control without insecticides.....	20
Natural enemies .....	20
Conserving natural enemies .....	21
Take a whole-farm or regional approach .....	21
7.3.5 <i>Helicoverpa</i> and insecticide resistance.....	22
Insecticide Resistance Management Strategy (IRMS).....	22
Major FS-IRMS guidelines: .....	22
<i>Helicoverpa</i> control on an area-wide basis.....	23
Control considerations .....	23
7.3.6 Monitoring.....	24
<b>7.4 Aphids.....</b>	<b>24</b>
7.4.1 Oat or wheat aphid.....	24
7.4.2 Corn aphid .....	26
7.4.3 Rose-grain aphid .....	27
7.4.4 Rice root aphid.....	29
Damage caused by aphids .....	29
7.4.5 Thresholds for control.....	30
7.4.6 Management of aphids.....	31
Natural enemies .....	31
Cultural control.....	32
7.4.7 Monitoring.....	32
<b>7.5 Cutworm (<i>Agrotis</i> spp.).....</b>	<b>32</b>
7.5.1 Varietal resistance or tolerance .....	33
7.5.2 Damage caused by pest .....	33
7.5.3 Conditions favouring development.....	34
7.5.4 Thresholds for control.....	34
7.5.5 Management of insect pest.....	34
<b>7.6 Armyworm .....</b>	<b>35</b>
7.6.1 Damage caused by armyworm .....	36
7.6.2 Thresholds for control.....	36
7.6.3 Management of armyworms .....	37
<b>7.7 Mites .....</b>	<b>38</b>
7.7.1 Brown wheat mite .....	38
7.7.2 Blue oat mite .....	39

7.7.3	Damage caused by pest .....	40
7.7.4	Thresholds for control.....	40
7.7.5	Management of insect pest.....	40
<b>7.8</b>	<b>Slaters.....</b>	<b>41</b>
7.8.1	Damage caused by slaters .....	42
7.8.2	Thresholds for control.....	42
7.8.3	Managing Slaters .....	42

## 10 Plant growth regulators and canopy management

<i>Key messages</i> .....	1
<b>10.1 Plant growth regulators</b> .....	<b>1</b>
10.1.1 Considering mixed results .....	2
<i>Conclusions: The value of PGRs</i> .....	3
10.1.2 Case study: using Moddus® Evo	
Key points: .....	3
Methods.....	3
Results.....	4
<b>10.2 Canopy management</b> .....	<b>4</b>
10.2.1 What does canopy management entail? .....	4
<i>Cereal canopy management in a nutshell</i> .....	6
10.2.2 Setting up the canopy.....	7
10.2.3 Soil-moisture status .....	7
10.2.4 Soil nitrogen .....	8
10.2.5 Seeding rate and date .....	9
<i>Row spacing</i> .....	9
<i>Row orientation</i> .....	9
<i>Yield</i> .....	10
<i>Plant spacing</i> .....	11
<i>Dry matter</i> .....	11
<i>Grain quality</i> .....	11
<i>Nitrogen management</i> .....	11
10.2.6 In-crop nitrogen.....	12
10.2.7 Limitations of tactical nitrogen application .....	12
<b>10.3 The future of canopy management in the Northern grains region</b> .....	<b>13</b>

## 11 Crop desiccation/spray out

## 12 Harvest

<i>Key messages</i> .....	1
<b>12.1 Windrowing</b> .....	<b>2</b>
12.1.1 Timing.....	2
12.1.2 Cutting.....	3
12.1.3 Harvesting the windrow .....	3
<b>12.2 Harvest timing</b> .....	<b>3</b>
12.2.1 Harvesting after lodging.....	5
12.2.2 Harvesting forage cereals .....	5
<i>When to cut for silage</i> .....	5
<i>Dry matter levels for ensiling</i> .....	5
<i>Mowing</i> .....	5
12.2.3 Equipment.....	6
<i>Standard headers</i> .....	6
<i>Forage harvesters</i> .....	7
<i>Balers</i> .....	7

<b>12.3</b>	<b>Fire prevention .....</b>	<b>8</b>
	<i>Harvester fire reduction checklist.....</i>	<i>8</i>
12.3.1	Harvesting in low-risk conditions.....	10
<b>12.4</b>	<b>Receival standards.....</b>	<b>11</b>
<b>12.5</b>	<b>Harvest weed-seed management.....</b>	<b>11</b>
12.5.1	Harvest weed-seed control.....	11
