

Pulse Field Day: Friday 14th October 2022

10am – 12noon “Stratherne”, 142 Reserve Rd, Daysdale

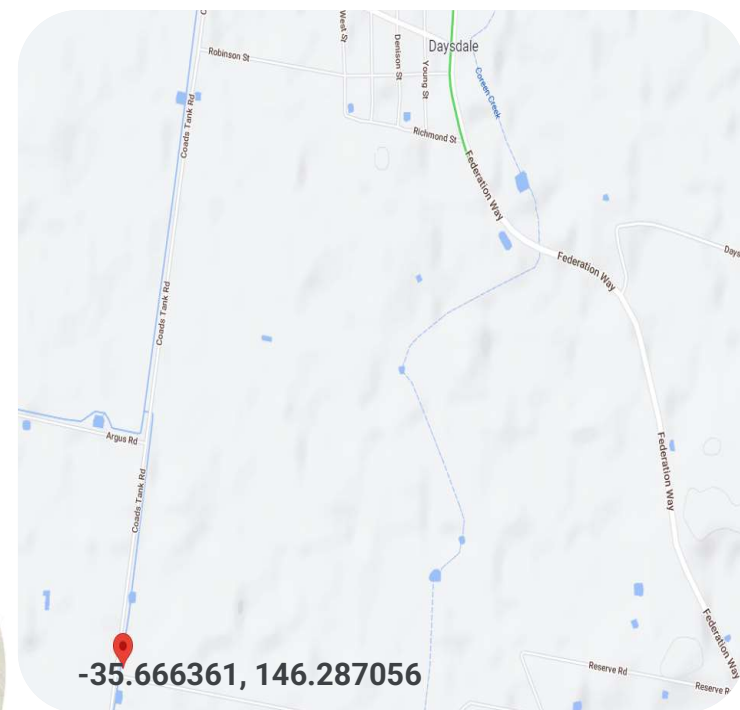

This is an opportunity for you to join us to take a look at the trials which are part of the GRDC investment NSW Pulse Agronomy Project which aims to close the economic yield gap and maximise farming systems benefits from grain legume production in NSW.

Rohan Brill of Brill Ag will be joined by Tom Price and Ben Morris of FAR Australia to guide you through the faba bean, vetch and chickpea trials, providing you with some background and what they are aiming to achieve.

Topics to be covered include:

- Disease management in faba beans - are there more sustainable ways to control disease in faba beans?
- How do pulse species fit our local farming system?
- Pulse species include faba beans, vetch, chickpeas and lentils
