TRITICALE

CONTENTS

Contents

Introduction

A.1 Crop overview	xxi
A.1.1 Triticale for human consumption.....	xxii
A.1.2 Triticale for animal consumption	xxiv
A.1.3 Triticale for biofuel	xxv
A.2 Growing regions	xxv
A.3 Brief history	xxvii
A.3.1 Triticale in Australia.....	xxvii

1 Planning/Paddock preparation

<i>Key messages</i>	1
1.1 Paddock selection	1
1.1.1 Topography.....	1
1.1.2 Soil	2
<i>The impact of different soil moisture and soil compaction on the growth of triticale root systems</i>	3
<i>Soil pH</i>	4
1.1.3 Sampling soil quality	6
<i>Sampling strategy</i>	7
<i>Sampling equipment</i>	7
<i>Sampling depth</i>	8
<i>Sample handling</i>	8
1.1.4 Biological inputs	8
<i>Yield constraints in the Southern Region</i>	8
1.1.5 Paddock selection for forage cereals.....	8
1.1.6 Weed burden and herbicide history	9
1.1.7 Fallow moisture and management.....	9
1.2 Paddock rotation and history	9
1.2.1 Triticale as a rotation crop	10
<i>Benefits of cereals as a rotation crop</i>	11
<i>Disadvantages of cereals as a rotation crop</i>	11
1.2.2 Break cropping	12
1.2.3 Long-fallow disorder	13
1.3 Fallow weed control	13
<i>Summer fallow weed control and residue management impacts on winter crop yield through soil water and N accumulation in a winter-dominant low rainfall region of southern Australia</i>	14
1.3.1 The green bridge	15
1.3.2 Management strategies	16
1.3.3 Stubble retention.....	17
<i>Reducing erosion risk</i>	17

	<i>Increasing soil water content</i>	17
	<i>Increasing soil carbon</i>	18
	<i>Other benefits of stubble retention</i>	18
	<i>Management practices affecting stubble cover</i>	18
1.4	Fallow chemical plant-back effects	19
	<i>Plant-back periods for fallowing herbicides</i>	20
1.4.1	Herbicide residues in soil: an Australia-wide study.....	22
1.5	Seedbed requirements	23
1.5.1	Structural decline of seedbed soil.....	25
	<i>Background</i>	25
	<i>Management to improve seedbed soil structure</i>	25
1.5.2	Tillage.....	26
	<i>Tillage, microbial biomass and soil biological fertility</i>	27
1.6	Soil moisture	30
1.6.1	Dryland.....	30
	<i>Soil-water extraction by dryland crops, annual pastures and lucerne in south-eastern Australia</i>	30
	<i>Monitoring soil moisture in dryland areas</i>	31
1.6.2	Irrigation.....	32
	<i>Genetic improvement of triticale for irrigation in south-eastern Australia</i>	33
	<i>The future of irrigation</i>	34
1.7	Yield and targets	34
	<i>Triticale v. durum wheat: a yield comparison in Mediterranean-type environments</i>	35
	<i>Estimating crop yields</i>	35
	<i>Yield Prophet®</i>	36
1.7.1	Seasonal outlook.....	37
	<i>CliMate</i>	37
	<i>Climate Analogues</i>	38
1.7.2	Fallow moisture.....	38
	<i>HowWet/N?</i>	38
1.7.3	Water Use Efficiency.....	39
	<i>Triticale grain yield and physiological response to water stress</i>	40
1.7.4	Nitrogen-use efficiency.....	42
	<i>Optimising nitrogen-use efficiency</i>	42
1.7.5	Double-crop options.....	42
	<i>Crop sequencing for irrigated double cropping in the Murrumbidgee Valley</i>	43
1.8	Disease status of paddock	44
1.8.1	Testing soil for disease.....	44
	<i>PreDicta B</i>	44
1.8.2	Effects of cropping history.....	45
1.9	Nematode status of paddock	46
1.9.1	Testing soil for nematodes.....	47
	<i>PreDicta B</i>	47
1.9.2	Effects of cropping history.....	47

1.10	Insect status of paddock.....	47
1.10.1	Testing soil for insects	48
	<i>Using a sweep net.....</i>	49
	<i>Soil sampling by spade.....</i>	49
	<i>Germinating-seed bait technique.....</i>	49
	<i>Identifying insects.....</i>	49
1.10.2	Effects of cropping history.....	50
2	Pre-planting	
	<i>Key messages.....</i>	1
2.1	Triticale as a dual-purpose crop	1
2.1.1	Benefits of growing dual-purpose or winter-forage crops.....	2
	1. <i>Minimises risks.....</i>	2
	2. <i>Capitalises on early rainfall</i>	2
	3. <i>Flexibility in enterprise mix.....</i>	2
	4. <i>Improved cash-flow.....</i>	3
2.1.2	When to graze.....	3
	<i>Evaluation of triticale as dual-purpose forage and grain crops.....</i>	5
2.1.3	Breeding dual-purpose triticale.....	5
2.1.4	Triticale grain for livestock.....	6
2.1.5	Triticale as a cover crop	7
	<i>Under-sowing lucerne</i>	8
2.2	Varietal performance and ratings yield	9
2.2.1	Varieties.....	10
	<i>New: Astute(1)</i>	10
	<i>Berkshire(1)</i>	11
	<i>New: Bison(1)</i>	11
	<i>Bogong(1)</i>	11
	<i>Canobolas(1)</i>	11
	<i>Chopper(1)</i>	12
	<i>Fusion(1)</i>	12
	<i>Goanna</i>	12
	<i>KM10</i>	12
	<i>Tahara</i>	12
	<i>Yowie</i>	13
	<i>Hawkeye(1)</i>	13
	<i>Jaywick(1)</i>	13
2.2.2	Dual-purpose triticales.....	13
	<i>Endeavour(1)</i>	13
	<i>Rufus.....</i>	13
	<i>Tobruk(1)</i>	14
	<i>Tuckerbox</i>	14
	<i>Yukuri.....</i>	14
2.3	Planting-seed quality.....	14
2.3.1	Seed size.....	15

2.3.2	Seed germination and vigour	17
2.3.3	Seed storage	19
2.3.4	Safe rates of fertiliser to sow with seed	21
3	Planting	
	<i>Key messages:</i>	1
3.1	Innoculation	1
3.2	Seed treatments	1
3.2.1	Emergence problems.....	2
3.2.2	Fertiliser at seeding	3
3.3	Time of sowing	3
	<i>Lodging</i>	4
3.4	Targeted plant population	5
3.5	Calculating seed requirements	7
3.6	Sowing depth	9
3.7	Sowing equipment	11
4	Plant growth and physiology	
	<i>Key Messages:</i>	1
4.1	Identifying triticales	1
4.2	Germination and emergence	3
	<i>Phase 1: Water absorption</i>	3
	<i>Phase 2: Activation</i>	4
	<i>Phase 3: Visible germination</i>	4
	<i>Conditions of germination</i>	4
4.2.1	Soil moisture.....	7
4.3	Effect of temperature, photoperiod and climate on plant growth and physiology	8
4.3.1	Temperature	8
4.3.2	Photoperiod.....	8
4.3.3	Salinity.....	9
	<i>The affect of salt stress on photosynthetic characteristics and growth of triticales</i>	9
4.3.4	Drought.....	9
	<i>The role of stomatal conductance for water and radiation use efficiency of durum wheat and triticales in a Mediterranean environment</i>	10
	<i>Water stress</i>	11
	<i>Triticale grain yield and physiological response to water stress</i>	11
4.4	Plant growth stages	11
4.4.1	Zadoks scale of cereal growth stages	11
	<i>Zadoks growth key</i>	13
4.4.2	Germination and early seedling growth.....	14
4.4.3	Tillering and vegetative growth	14
4.4.4	Stem elongation and heading	15
4.4.5	Flowering and grainfilling.....	16

4.4.6 Growth of triticale compared to other cereals17
Variation in temperate cereals in rain-fed environments20

5 Nutrition and fertiliser

Key messages1

5.1.1 Declining soil fertility2
Balancing sources of nutrition3

5.1.2 Fertilisers3
Application5

5.1.3 Fungi and soil health5
Management to optimise mycorrhizae6

5.2 Crop removal rates7

5.3 Soil testing7

5.3.1 Why test soil?8

5.3.2 Basic requirements8

5.3.3 Types of test8

5.4 Plant-tissue testing for nutrition levels.....9

5.4.1 Plant tissue analysis9

5.5 Nitrogen10
Responses of triticale, wheat, rye and barley to nitrogen fertiliser12

5.5.1 Symptoms of deficiency13
What to look for in the paddock13
What to look for in the plant13
What else it could be15

5.5.2 Managing nitrogen15
Timing of application15
Budgeting16

5.6 Phosphorus16
Cereal types and phosphorus use in Waikerie, Murray Mallee17

5.6.1 Symptoms of deficiency19
What to look for in the paddock19
What to look for in the plant19
What else it could be21
Soil testing22

5.6.2 Managing phosphorus22

5.7 Sulfur23

5.7.1 Symptoms of deficiency24
What to look for in the paddock24
What to look for in the plant24
What else it could be26

5.7.2 Managing sulfur26
Supplies of sulfur (elemental or sulphate)26

5.8 Potassium27

5.8.1 Symptoms of deficiency28

<i>What to look for in the paddock</i>	28
<i>What to look for in the plant</i>	28
<i>What else it could be</i>	29
5.8.2 Managing potassium	30
<i>Fertiliser types</i>	30
<i>Fertiliser placement and timing</i>	30
5.9 Micronutrients	31
5.9.1 Manganese	32
<i>Symptoms of deficiency</i>	32
<i>Managing manganese deficiency</i>	35
5.9.2 Copper	35
<i>Tolerance of triticale, wheat and rye to copper deficiency in low and high soil pH</i> 35	
<i>Symptoms of deficiency</i>	36
<i>Managing copper deficiency</i>	38
5.9.3 Zinc	39
<i>Symptoms of deficiency</i>	39
<i>Managing zinc deficiency</i>	41
5.9.4 Iron	42
<i>Symptoms of deficiency</i>	42
<i>Managing iron deficiency</i>	44
5.10 Nutritional deficiencies	44
5.10.1 Making use of the crop-nutrition information available to you	44
<i>Useful resources</i>	44
6 Weed control	
<i>Key messages</i>	1
6.1 Weed competitiveness of triticale	1
6.1.1 Best management practices for weed control in triticale	2
6.2 Integrated weed management	3
6.2.1 IWM for triticale	3
<i>The effect of cultivation and row spacing on the competitiveness of triticale</i>	3
6.2.2 General IWM principles and tactics	4
<i>Review past actions</i>	5
<i>Assess the current weed status</i>	6
<i>Identify weed management opportunities</i>	6
<i>Fine-tune your list of options</i>	6
<i>Combine and test ideas</i>	6
6.2.3 IWM in the southern region	7
6.3 Key weeds of Australia’s cropping systems	8
<i>RIM (Ryegrass Integrated Management)</i>	9
6.3.1 Ryegrass management in the southern region	10
<i>Mouldboard ploughing</i>	11
<i>Pre-emergent herbicides</i>	11
<i>Narrow windrow burning</i>	11
6.3.2 Brome grass and barley grass in the southern region	11

	<i>Managing brome grass and barley grass</i>	13
6.3.3	Emerging threat of flaxleaf fleabane	13
	<i>Control strategy</i>	14
6.3.4	Feathertop Rhodes grass heads south	15
	<i>Fallow control</i>	15
	<i>In-crop control</i>	16
6.3.5	Wild radish resistance	16
6.4	Herbicides	17
6.4.1	Herbicides explained	18
	<i>Residual and non-residual herbicides</i>	18
	<i>Pre-emergent and post-emergent herbicides</i>	18
	<i>Herbicide groups</i>	18
6.5	Pre-emergent herbicides	19
6.5.1	Benefits and concerns	19
6.5.2	Understanding pre-emergent herbicides	20
	<i>Behaviour of pre-emergent herbicides in the soil</i>	20
6.5.3	Top tips for using pre-emergent herbicides	21
6.6	Post-planting pre-emergent herbicides	22
6.6.1	Incorporation by sowing	22
6.7	In-crop herbicides: knockdowns and residuals	24
6.7.1	Applying in-crop herbicides	24
	<i>How to get the most out of post-emergent herbicides</i>	25
6.7.2	Agricultural Chemical Control Areas	25
6.8	Conditions for spraying	27
6.8.1	Minimising spray drift	28
6.8.2	Types of drift	29
6.8.3	Factors in the risk of spray drift	30
	<i>Volatility</i>	30
6.8.4	Minimising drift	31
6.8.5	Spray release height	32
6.8.6	Size of area treated	32
6.8.7	Capture surface	32
6.8.8	Weather conditions to avoid	33
6.9	Testing for herbicide tolerance	34
6.10	Potential herbicide damage of triticale	34
6.10.1	Avoiding crop damage from residual herbicides	35
	<i>What are the issues?</i>	35
	<i>Which herbicides are residual?</i>	35
	<i>How can I avoid damage from residual herbicides?</i>	36
6.10.2	Plant-back intervals	37
	<i>How does resistance start?</i>	41
6.10.3	General principles to avoid resistance	41

	<i>Glyphosate-resistant weeds in Australia</i>	43
6.10.4	Ten-point plan to weed out herbicide resistance	44
	1. <i>Act now to stop weed seedset</i>	44
	2. <i>Capture weed seeds at harvest</i>	44
	3. <i>Rotate crops and herbicide modes of action</i>	45
	4. <i>Test for resistance to establish a clear picture of paddock-by-paddock status</i> ..	45
	5. <i>Never cut the rate</i>	46
	6. <i>Don't automatically reach for glyphosate</i>	46
	7. <i>Carefully manage spray events</i>	46
	8. <i>Plant clean seed into clean paddocks with clean borders</i>	46
	9. <i>Use the double-knock technique</i>	47
	10. <i>Employ crop competitiveness to combat weeds</i>	47
6.10.5	If you think you have resistant weeds	47
	<i>Testing services</i>	48
6.10.6	Monitoring weeds	48
	<i>Tips for monitoring</i>	49
7	Insect control	
	<i>Key messages</i>	1
7.1	Potential insect pests	2
7.2	Integrated pest management	5
	7.2.1 Key IPM strategies	6
	7.2.2 Insecticide choices	6
	7.2.3 Insecticide resistance	6
	7.2.4 Insect sampling methods.....	6
	<i>Factors that contribute to quality monitoring</i>	6
	<i>Keeping good records</i>	7
	<i>Sampling methods</i>	8
	<i>Identifying insects</i>	10
7.3	Russian wheat aphid	10
	7.3.1 Damage caused by RWA	12
	7.3.2 Where to look and what to look for.....	12
	<i>Measures to increase the likelihood of detecting RWA</i>	13
	7.3.3 Thresholds for control.....	15
	7.3.4 Management of RWA	16
	<i>Control options</i>	16
7.4	Aphids	16
	7.4.1 Oat or wheat aphid.....	17
	7.4.2 Corn aphid	17
	7.4.3 Rose-grain aphid	18
	7.4.4 Conditions favouring aphid development.....	19
	7.4.5 Thresholds for control.....	19
	7.4.6 Managing aphids.....	19
	<i>Biological control</i>	20

	<i>Cultural control</i>	20
	<i>Chemical control</i>	20
	<i>Monitoring</i>	21
7.5	Cutworm	21
7.5.1	Damage caused by cutworms	23
7.5.2	Thresholds for control.....	23
7.5.3	Managing cutworm	24
	<i>Biological control</i>	24
	<i>Cultural control</i>	24
	<i>Chemical control</i>	24
7.6	Mites	24
7.6.1	Redlegged earth mite	24
	<i>Damage caused by RLEM</i>	26
	<i>Managing RLEM</i>	26
7.6.2	Balaustium mite	29
	<i>Damage caused by Balaustium mite</i>	30
	<i>Management</i>	30
7.6.3	Blue oat mite	31
	<i>Damage caused by BOM</i>	33
	<i>Managing BOM</i>	33
7.6.4	Bryobia mite	35
	<i>Damage cause by Bryobia mites</i>	37
	<i>Managing Bryobia mites</i>	37
7.7	Lucerne flea	37
7.7.1	Damage caused by the lucerne flea.....	39
7.7.2	Managing the lucerne flea.....	39
	<i>Biological control</i>	40
	<i>Cultural control</i>	40
	<i>Chemical control</i>	41
7.8	Armyworm	41
7.8.1	Damage caused by armyworms	43
7.8.2	Thresholds for control.....	44
7.8.3	Managing armyworms	44
	<i>Sampling and detection</i>	44
	<i>Biological control</i>	45
	<i>Cultural control</i>	45
	<i>Chemical control</i>	45
7.9	Slugs and snails	46
7.9.1	Economic thresholds for control.....	48
7.9.2	Managing slugs and snails	48
	<i>Biological control</i>	48
	<i>Cultural control</i>	49
	<i>Chemical control</i>	49
	<i>Monitoring snails</i>	49

	<i>Monitoring slugs</i>	50
7.10	Wireworms and false wireworms	51
7.10.1	False wireworms	51
	<i>Biology</i>	53
	<i>Damage caused by false wireworms</i>	54
7.10.2	True wireworm	55
	<i>Biology</i>	55
	<i>Damage</i>	56
7.10.3	Sampling and detection of wireworms.....	56
	<i>Sampling</i>	56
	<i>Detection</i>	56
7.10.4	Control	56
7.11	Plague locusts	57
8	Nematode management	
	<i>Key messages</i>	1
	<i>Cereal root disease management in Victoria and southern Australia</i>	2
8.1	Root-lesion nematodes (RLN)	3
8.1.1	Symptoms	5
	<i>Soil testing</i>	7
8.1.2	Varietal resistance or tolerance	7
8.1.3	Damage caused by RLN.....	7
8.1.4	Conditions favouring development.....	8
	<i>How long does it take to reduce P. thornei in soils?</i>	8
8.1.5	Thresholds for control.....	9
8.1.6	Management of RLN	9
8.2	Cereal cyst nematodes	11
8.2.1	Symptoms and detection	12
8.2.2	Varietal resistance or tolerance	14
8.2.3	Damage caused by CCN.....	14
8.2.4	Management	14
8.3	Nematodes and crown rot	15
8.3.1	Management	16
	<i>Soil testing</i>	16
8.3.2	Varietal choice	17
9	Diseases	
	<i>Key messages</i>	1
9.1	General disease-management strategies	2
	<i>Cereal root disease management in the Southern region</i>	2
9.1.1	Tools for diagnosing cereal diseases	3
	<i>Crop Disease Au app</i>	3
	<i>The app Crop Disease Au, developed by the National Variety Trials, allows the user to quickly:</i>	3

MyCrop	3
CropPro.....	4
9.2 Rust	4
9.2.1 Varietal resistance or tolerance	5
9.2.2 Symptoms	6
9.2.3 Stripe rust.....	7
<i>Stripe rust in southern Australia</i>	8
<i>Managing stripe rust</i>	8
9.2.4 Stem rust (black rust).....	9
<i>Stem rust in southern Australia</i>	10
9.2.5 Leaf rust (brown rust)	10
9.2.6 Managing cereal rust	12
<i>Breeding cereals for rust resistance in Australia</i>	12
9.3 Yellow leaf spot (tan spot).....	13
9.3.1 Varietal resistance	14
9.3.2 Damage caused by yellow leaf spot.....	14
9.3.3 Symptoms	14
9.3.4 Conditions favouring development.....	15
9.3.5 Management of disease.....	16
<i>Minimising the risk of yellow leaf spot</i>	16
<i>In-crop fungicides and timing</i>	16
9.3.6 Integrated disease management of rusts and yellow leaf spot.....	17
9.4 Take-all	17
9.4.1 Symptoms	18
<i>What to look for in the paddock</i>	18
<i>What to look for in the plant</i>	19
9.4.2 Conditions favouring development.....	20
<i>Hosts</i>	20
9.4.3 Managing take-all.....	21
9.5 Crown rot	21
9.5.1 Update on the latest research.....	22
9.5.2 Damage caused by crown rot.....	23
9.5.3 Symptoms of crown rot	24
9.5.4 Symptoms of Fusarium head blight.....	26
9.5.5 Conditions favouring development.....	27
<i>Crown rot</i>	27
<i>FHB</i>	28

 13.1.5 Insecticide treatment 8

 13.1.6 Monitoring stored grain..... 8

 13.1.7 Grain storage: get the economics right..... 9

Comparing on-farm grain storages..... 9

13.2 Stored grain pests 11

 13.2.1 Prevention is better than cure 12

 13.2.2 Common species 12

Why identify insect pests of stored grain pests? 13

 13.2.3 Monitoring grain for pests..... 13

 13.2.4 Hygiene 14

Where to clean..... 14

When to clean..... 15

How to clean..... 15

13.2.5 Aeration cooling for pest control	17
13.2.6 Structural treatments	17
13.2.7 Application	17
<i>Silo application</i>	18
13.2.8 Fumigation	18
<i>Maximum residue limits</i>	20
<i>Phosphine application</i>	21
<i>Non-chemical treatment options</i>	21
13.3 Grain protectants for storage	22
<i>K-Obiol® EC Combi</i>	22
<i>Conserve™ On-farm</i>	22
13.4 Aeration during storage	22
13.4.1 Dealing with moist grain	22
13.4.2 Aeration cooling	24
<i>Blending</i>	24
13.4.3 Aeration drying	25
<i>High airflow for drying</i>	25
<i>Ducting for drying</i>	25
<i>Venting for drying</i>	26
<i>Weather conditions for drying</i>	26
<i>Phase one of drying</i>	26
<i>Phase two of drying</i>	26
<i>Supplementary heating</i>	27
<i>Cooling after drying</i>	27
13.4.4 Aeration controllers	27
14 Environmental issues	1
<i>Key messages</i>	1
14.1 Frost issues for triticale	2
14.1.1 Triticale and frost	4
<i>Frost tolerance in triticale and other winter cereals at flowering</i>	5
14.1.2 Conditions that lead to frost	7
14.1.3 Diagnosing stem and head frost damage in cereals	8
<i>What to look for in the paddock</i>	9
<i>What to look for in the plant</i>	10
14.1.4 Managing frost risk	11
<i>Farm management planning tactics</i>	12
<i>Frost zone management tactics</i>	12
<i>Diversity the key to balancing frost and heat risks</i>	15
14.1.5 New insight into frost events and management	16
14.1.6 Guidelines to reduce frost risk and assess frost damage	19
<i>Matching variety to planting opportunity</i>	19
<i>Measuring crop temperature</i>	19
14.1.7 What to do with a frosted crop	20
<i>Option 1: Take through to harvest</i>	21

Option 2: Cut and bale.....	21
Option 3: Grazing, manuring and crop-topping.....	22
Useful tools.....	23
14.1.8 National Frost Initiative.....	23
14.2 Waterlogging and flooding issues for triticale.....	23
14.2.1 Where waterlogging occurs.....	25
<i>Constraints and opportunities for crop production in the high-rainfall zone of southern Australia.....</i>	25
<i>Identifying problem areas.....</i>	26
14.2.2 Symptoms and causes.....	26
<i>What to look for in the paddock.....</i>	27
