FARM TO PROFIT FARM BUSINESS UPDATE

Moree, New South Wales, Wednesday 13 February 2019

AnyOccasion@TheMax, Level 1/30 Heber Street, Moree
9.30 am to 4:00 pm (doors open at 9.00 am for a 9.30 am start)

On-farm storage investment and grain marketing – planning, management and economics.

This three-part presentation will focus on the evaluation, planning and process for an investment of capital in on-farm storage, explaining how growers can develop marketing and operational strategies to leverage the maximum financial returns. To be followed by a 20-minute Q&A session with the panel of 3 presenters.

The marketing phase is the first step in analysis, understanding the market, focusing on a marketing plan and maintaining the flexibility required. Detailed on-farm storage practices & record keeping are the cornerstone to build market confidence, this requires setting standards of practice for on farm QA from harvest to sale and enables growers to be well positioned for market opportunities. Economic return on the investment of capital in on-farm storage from grain bags through to silos, is driven by the ability to develop a strategy from sowing, to harvest through to sale which optimises the financial returns.

Left Field Solutions*

*Philip Burrill,
Dept of Agriculture and Fisheries*

*Chris Warrick,
Primary Business*

Climate variability – how to build resilience through farming systems, financial management and on-farm operations and decision making.

How do you create a more resilient business that can withstand increasing climate variability? Farming systems planning, financial management skills, responsive and flexible farm operations and agronomic practices are core business competencies that can increase business resilience.

Climate variability and its impact on farming systems, financial management and agronomic practices will be explored in this three-part presentation, to provide insights on strategies to manage risk and build business resilience. The individual presentations will be followed by an interactive 20-minute Q&A session with the 3 presenters.

Lindsay Bell, CSIRO

Simon Fritsch, Agripath

Tim Poole, Poole Ag Consulting

Creating a prosperous farming future – building resilience

Ken will outline the core attributes of a prosperous business and identify the characteristics of the key profit drivers of a resilient business. He will explain why management structures and business strategy are important in farming businesses. Ken will also provide insight into how identifying your personal priority list, your non-negotiables and fostering emotional intelligence can build personal resilience. *Ken Solly, Solly Business Services*

How HR compliance and best practice can positively impact the recruitment, management and retention of skilled staff

Labour management, HR compliance and best practice adoption, from recruitment and training of new staff, through to creating a positive work environment. How to attract and retain the right employees against the current industry outlook for labour supply.

Liz Jamieson, Rimfire Resources
