

BANNOCKBURN
VICTORIA
THURSDAY 27TH
FEBRUARY 2020

GRAINS RESEARCH UPDATE

Bannockburn Cultural Centre, 27 High Street

9.00 am to 1.00 pm followed by lunch (doors open at 8.30 am for a 9.00 am start)

Topics

▶ **Breaking the big yield constraints – where to next?**

Assessing the opportunities to overcome the big yield constraints facing the industry over the next 5 to 10 years. Where will the real research breakthroughs likely come from?

James Hunt

La Trobe University

▶ **Hitting production targets in the UK amidst a highly regulated environment**

How are growers and agronomists managing the pesticide exclusions and restrictions being placed on the industry in the UK. What innovative technologies are emerging to hit their huge yield potentials.

Keith Norman

*Keith Norman
Consultancy Ltd, UK*

▶ **Crop doctor -cereal disease update**

A comprehensive update on disease trends in 2019 and management going forward; including the behaviour of stripe rust outbreaks.

Grant Hollaway

Agriculture Victoria

▶ **Integrating new chemistries in the field**

Update on resistance data on pre-emergent herbicides. Best use of new chemistries in the context of crop safety plant back, where they fit in the rotation, soil, rainfall and seasonal impacts.

Chris Preston

University of Adelaide

▶ **Addressing the yield gap in the High Rainfall Zone**

Jon and Keith will join forces to compare and contrast local hyper yielding trial results with international production capabilities and discuss constraints being tackled both here and overseas

Jon Midwood, SFS

*and Keith Norman,
Consultancy Ltd, UK*
