

WIMMERA FABABEAN GROWERS...

Are you sick of your bean yields being all over the place?

Our discussion group, combined with paddock-scale strip trials, is working with Wimmera growers, agronomists, and pulse experts to find ways to grow more consistent faba bean crops – no more failure beans!

Join us for our second meeting to review the 2024 paddock-scale strip trials and pick up practical tips to boost your faba bean yields this season. We'll discuss:

- Performance in a dry season
- Soil testing
- Lime
- Nutrition
- Trial plans for 2025

Plus, guest presenter James Manson on 'From Flower to Pod to Yield: What's Holding Your Beans Back?'

EVENT DETAILS: Bungalally. Wednesday 19th March, 4:30pm
