

# WINTER CROPPING FIELD WALKS & NGN DISCUSSION

## TULLOONA & LUNDAVRA

## Growers and advisors are invited to join us on two field walks in the Goondiwindi area.

Join us to explore the latest grain variety trials in your area. Learn directly from breeders and gain insights into yield performance, quality, and disease resistance.

The GRDC National Variety Trials (NVT) program offers independent, consistent, and timely comparative data on commercial grain varieties. Our trials are conducted following local best practices, ensuring results are relevant to your farming operations.

The Tulloona field walk will also include a look at a crown rot pathology trial, led by Steven Simpfendorfer, NSW DPI.

GRDC Grower Relations Managers' Bec Raymond and Sally Dickinson will be available to discuss the National Grower Network (NGN) and provide updates on current projects in the region. This is also an opportunity to raise any topics you would like to see addressed through GRDC investment.

**Everyone is welcome!**

*For more information, directions and to RSVP contact:*
