Introduction

A.1	Crop overview	xxii
A.1.1	Comparative notes	xxii
A.1.2	Description.....	xxii
A.1.3	Rye for human consumption.....	xxiv
A.1.4	Rye for animal consumption.....	xxiv
	<i>Grain</i>	xxiv
	<i>Forage</i>	xxv
	<i>Pasture</i>	xxv
A.2	Growing regions	xxv
A.3	Brief history	xxvii

1 Planning/Paddock preparation

	<i>Key messages:</i>	1
1.1	Paddock selection	1
1.1.1	Topography.....	1
	<i>Topography mediates the influence of cover crops on soil nitrate levels</i>	2
1.1.2	Soil	3
	<i>Rye on erosion-prone soils</i>	4
	<i>Soil pH</i>	5
	<i>Managing soil pH</i>	6
1.1.3	Sampling soil quality	6
	<i>Sampling strategy</i>	7
	<i>Sampling equipment</i>	8
	<i>Sampling depth</i>	8
	<i>Sample handling</i>	8
1.1.4	Biological inputs	9
	<i>Yield constraints in the Southern Region</i>	9
1.2	Paddock rotation and history	9
	<i>Allelopathic effects</i>	11
1.2.1	Rotation issues.....	11
1.2.2	Break cropping	12
1.2.3	Long-fallow disorder	13
1.3	Fallow weed control	14
	<i>Summer fallow weed control and residue management impacts on winter crop yield through soil water and N accumulation in a winter-dominant low rainfall region of southern Australia</i>	15
1.3.1	The green bridge	16
1.3.2	Management strategies	17
1.3.3	Benefits of stubble retention	17
	<i>Reducing erosion risk</i>	18
	<i>Increasing soil-water content</i>	18

	<i>Increasing soil carbon</i>	18
	<i>Other benefits of stubble retention</i>	19
	<i>Management practices affecting stubble cover</i>	19
1.4	Fallow chemical plant-back effects	19
	<i>Conditions required for breakdown</i>	21
	<i>Plant-back periods for fallow herbicides in the Southern Region</i>	21
1.4.1	Herbicide residues in soil—an Australia-wide study	22
1.5	Seedbed requirements	24
1.5.1	Seedbed soil structure decline	25
	<i>Background</i>	25
	<i>Management to improve seedbed soil structure</i>	26
1.6	Soil moisture	26
1.6.1	Dryland	26
	<i>Soil-water extraction by dryland crops, annual pastures and lucerne in south-eastern Australia</i>	27
	<i>Monitoring soil moisture in dryland areas</i>	27
1.6.2	Tillage	28
	<i>Tillage, microbial biomass and soil biological fertility</i>	30
1.6.3	Irrigation	32
	<i>Dry matter accumulation and changes in forage quality during primary growth and three regrowths of irrigated winter cereals</i>	33
	<i>The future of irrigation</i>	34
1.7	Yield and targets	34
	<i>Estimating crop yields</i>	35
	<i>Yield Prophet®</i>	36
1.7.1	Seasonal outlook	36
	<i>CliMate</i>	37
	<i>Climate analogues</i>	37
1.7.2	Fallow moisture	38
	<i>HowWet?</i>	38
1.7.3	Water Use Efficiency	38
	<i>Strategies to increase yield</i>	39
	<i>The French–Schultz approach</i>	39
1.7.4	Nitrogen-use efficiency	40
	<i>Improving NUE</i>	40
	<i>Optimising N fertiliser use</i>	41
	<i>Environment and genotype influence on grain protein concentration of wheat and rye</i>	41
1.7.5	Double crop options	42
1.8	Disease status of paddock	42
1.8.1	Cropping history effects	42
1.8.2	Soil testing for disease	43
	<i>PreDicta B</i>	43
1.8.3	Nematode status of paddock	44
	<i>Nematode testing of soil</i>	45

	<i>Effects of cropping history on nematode status</i>	45
1.9	Insect status of paddock	45
1.9.1	Sampling of paddocks and soil for insects	46
	<i>Sampling methods</i>	46
1.9.2	Identification.....	47
	<i>Insect ID: The Ute Guide</i>	47
1.9.3	Effect of cropping history.....	48
2	Pre-planting	1
	<i>Key messages</i>	1
2.1	Cereal rye as an alternative crop	1
	<i>Cereal rye—an alternative grain crop</i>	1
2.1.1	Dual-purpose cropping.....	2
	<i>Importance of variety choice</i>	6
2.1.2	Cereal rye for forage.....	7
2.1.3	Break or cover cropping	8
	<i>Cover-crop mixtures</i>	9
	<i>Break benefits on Mallee soils</i>	10
	<i>Control of cover crops</i>	14
	<i>Control of cereal rye with a roller/crimper as influenced by cover crop phenology</i> 16	
	<i>Prevention of wind erosion</i>	16
2.2	Varietal performance and ratings	17
2.2.1	Identifying products for industry	17
	<i>Low- and high-amylose rye</i>	17
	<i>Low- and high-pentosan rye</i>	17
	<i>White rye</i>	17
	<i>High-molecular-weight glutenin rye</i>	18
	<i>Long-season dual-purpose rye</i>	18
2.2.2	Developing products for industry	18
	<i>Opportunities</i>	19
2.2.3	Varieties.....	19
	<i>Bevy</i>	19
	<i>Southern Green forage rye</i>	19
	<i>Ryesun</i>	21
	<i>Vampire</i> (b)	21
	<i>Westwood</i>	22
2.3	Quality of planting seed	22
2.3.1	Seed size and coleoptile length.....	23
2.3.2	Seed germination and vigour	24
	<i>Seed purity</i>	25
2.3.3	Seed storage.....	26
2.3.4	Safe rates of fertiliser sown with the seed	26
3	Planting	1
	<i>Key messages</i>	1

3.1	Seed treatments	1
3.1.1	Emergence problems.....	2
3.1.2	Fertiliser at seeding	2
3.2	Time of sowing.....	3
3.3	Targeted plant population	3
	<i>Effect of seeding rate and planting arrangement on rye cover crop and weed growth.....</i>	<i>4</i>
3.4	Calculating seed requirements.....	5
	<i>Agronomic requirements for a semi-dwarf rye variety: phosphorus and sowing rate.....</i>	<i>5</i>
3.5	Sowing depth	7
3.6	Sowing equipment	8
4	Plant growth and physiology	
	<i>Key messages.....</i>	<i>1</i>
4.1	Characteristics of the cereal rye plant	1
4.2	Germination and emergence issues.....	3
4.2.1	Dormancy.....	3
	<i>The seedbank dynamics of volunteer rye.....</i>	<i>3</i>
4.2.2	Germination	4
4.2.3	Emergence.....	5
4.3	Environmental effects on plant growth and physiology	5
4.3.1	Photoperiod and temperature	5
	<i>Effect on frost tolerance.....</i>	<i>6</i>
4.3.2	Salinity.....	6
4.3.3	Soil water.....	7
	<i>Shoot and root dry weight and soil water in wheat, triticale and rye.....</i>	<i>7</i>
4.4	Plant growth stages	7
4.4.1	Roots.....	8
4.4.2	Plant development: photosynthesis and maturation.....	11
4.4.3	Vegetative behaviour	11
4.4.4	Flowering and grain formation	12
5	Nutrition and fertiliser	
	<i>Key messages.....</i>	<i>1</i>
5.1	Soil nutrient balance.....	1
5.1.1	Benefits of rye to soil health	1
	<i>Winter cover crop effects on soil organic carbon in soil.....</i>	<i>3</i>
5.1.2	Fertiliser application.....	3
	<i>Application considerations</i>	<i>3</i>
	<i>Agronomic requirements of a new semi-dwarf rye variety: N and P.....</i>	<i>4</i>
5.1.3	Fungi and soil health.....	5
	<i>Management to optimise AMF population.....</i>	<i>6</i>
5.2	Crop removal rates	6

5.3 Soil testing 7

 5.3.1 Why test soil? 7

 5.3.2 Basic requirements 8

 5.3.3 Types of test 8

5.4 Plant and/or tissue testing for nutrient levels 8

 5.4.1 Why measure nutrients in plant tissues? 8

 5.4.2 What plant-tissue analysis shows 9

5.5 Nitrogen 10

Accumulation and loss of N during growth and maturation of cereal rye 11

Nitrate leaching under a cereal rye cover crop 11

 5.5.1 Nitrogen-deficiency symptoms in cereals 12

What to look for 12

What else could it be? 14

 5.5.2 Managing nitrogen 14

Timing of application 14

Budgeting 14

5.6 Phosphorus 15

Uptake and utilisation of P from iron phosphate—rye shows efficiency 16

 5.6.1 Managing phosphorus 17

 5.6.2 Phosphorus-deficiency symptoms 17

What to look for 17

What else could it be? 19

 5.6.3 Soil testing 19

5.7 Sulfur 20

 5.7.1 Sulfur deficiency symptoms 20

What to look for 20

What else could it be? 22

5.8 Potassium 22

 5.8.1 Potassium deficiency symptoms 23

What to look for 23

What else could it be? 25

 5.8.2 Assessing potassium requirements 26

 5.8.3 Fertiliser types 26

 5.8.4 Fertiliser placement and timing 26

5.9 Micronutrients 27

 5.9.1 Zinc 27

Deficiency symptoms 27

What else could it be? 28

Differential response of rye, triticale, bread and durum wheats to zinc deficiency in calcareous soils 29

Managing zinc deficiency 30

Role of rye chromosomes in improvement of zinc efficiency in wheat and triticale 31

 5.9.2 Manganese 31

Tolerance of barley and other cereals to manganese-deficient calcareous soils of South Australia 32

Deficiency symptoms 32

What else could it be? 34

Managing manganese deficiency 34

5.9.3 Copper 35

Deficiency symptoms 35

What else could it be? 37

Managing copper deficiency 37

5.9.4 Iron 37

Symptoms 38

What else could it be? 39

Managing iron deficiency 40

5.10 Aluminium toxicity 40

5.11 Nutritional deficiencies 40

Making use of the crop nutrition information available to you 40

6 Weed control

Key messages 1

6.1 Cereal rye: a weed suppressor 1

Rye residues contribute weed suppression in no-tillage cropping systems 2

6.1.1 Allelopathic effects 2

Managing land classes for better feed utilisation 3

Remove cereal rye early to avoid problems from its allelopathic effect 5

6.1.2 Volunteer rye 5

6.2 Integrated weed management 7

6.2.1 Five-point plan 8

1. Review past actions 8

2. Assess the current weed status 8

3. Identify weed management opportunities within the cropping system 9

4. Fine-tune your list of options 9

5. Combine and test ideas 9

6.2.2 IWM in the Southern Region 10

South Australian Weed Control app 11

6.2.3 Cover cropping for weed management 12

Overcoming weed management challenges in organic rotational no-till soybean production based on cover cropping 12

6.3 Key weeds in Australia’s cropping systems 13

6.3.1 Annual ryegrass management in the Southern Region 14

South Australian trial 14

Victorian trial 15

6.3.2 Brome grass and barley grass in the Southern Region 15

Brome grass 15

Barley grass 17

6.3.3 Emerging flaxleaf fleabane threat 17

Control strategy.....	18
6.3.4 Wild radish herbicide resistance.....	19
6.4 Herbicides explained.....	20
6.4.1 Residual and non-residual.....	20
6.4.2 Post-emergent and pre-emergent.....	20
6.5 Pre-emergent herbicides.....	21
6.5.1 Understanding pre-emergent herbicides.....	22
6.5.2 Behaviour of pre-emergent herbicides in the soil.....	22
6.5.3 Top tips for using pre-emergent herbicides.....	23
6.5.4 Post-sowing pre-emergent (PSPE) herbicide use.....	23
6.5.5 Incorporation by sowing (IBS).....	24
6.5.6 Control of annual ryegrass and crop safety with use of pre-emergent residual herbicides.....	24
Key findings.....	24
Conclusions.....	25
6.6 In-crop herbicides: knock-downs and residuals.....	26
6.6.1 Key points for in-crop herbicide application.....	26
6.6.2 How to get the most out of post-emergent herbicides.....	27
6.7 Conditions for spraying.....	27
6.7.1 Minimising spray drift.....	28
<i>Before spraying</i>	28
During spraying	28
6.7.2 Types of drift.....	29
6.7.3 Factors affecting the risk of spray drift.....	29
<i>Volatility</i>	30
6.7.4 Equipment and settings for minimising drift.....	30
<i>Spray release height</i>	31
<i>Size of area treated</i>	31
<i>Capture surface</i>	32
6.7.5 Weather conditions to avoid.....	32
<i>Turbulence</i>	32
<i>High temperatures</i>	32
<i>Humidity</i>	32
<i>Wind</i>	32
<i>Inversions</i>	32
6.8 Herbicide tolerance ratings.....	33
6.9 Potential herbicide damage effect.....	33
6.9.1 Avoiding crop damage from residual herbicides.....	33
<i>What are the issues?</i>	33
<i>Which herbicides are residual?</i>	34
<i>How to avoid damage from residual herbicides</i>	34
6.9.2 Plant-back intervals.....	35
<i>Conditions required for breakdown</i>	37

6.10	Herbicide resistance	38
6.10.1	Understanding herbicide resistance.....	38
	<i>Herbicide resistance facts</i>	38
	<i>Key messages</i>	38
	<i>How does resistance start?.....</i>	39
6.10.2	General principles to avoid resistance.....	39
	Glyphosate-resistant weeds in Australia	41
6.10.3	The 10-point plan to weed out herbicide resistance	42
	<i>If you think you have resistant weeds.....</i>	46
6.11	Monitoring weeds.....	47
6.11.1	Tips for monitoring.....	48
7	Insect control	1
	<i>Key messages</i>	1
7.1	Potential insect pests	1
7.2	Integrated pest management	5
	<i>Key IPM strategies</i>	5
	<i>Insecticide choices</i>	5
	<i>Insecticide resistance</i>	5
7.2.1	Insect sampling methods.....	6
	<i>Factors that contribute to quality monitoring.....</i>	6
	<i>Keeping good records.....</i>	6
	<i>Sampling methods.....</i>	7
7.3	Russian wheat aphid.....	10
	<i>Key points</i>	10
7.3.1	Damage caused by RWA	12
7.3.2	Where to look and what to look for	13
	<i>Measures to increase the likelihood of RWA detection</i>	14
	<i>Where to find the RWA</i>	15
7.3.3	Thresholds for control.....	15
7.3.4	Management of RWA	16
	<i>Control options.....</i>	16
	<i>Bees.....</i>	16
	<i>General instructions</i>	16
7.4	Aphids.....	17
7.4.1	Oat or wheat aphid.....	17
7.4.2	Corn aphid	18
7.4.3	Rose-grain aphid	18
7.4.4	Conditions favouring aphid development.....	19
7.4.5	Thresholds for control.....	20
7.4.6	Managing aphids.....	20
	<i>Biological control.....</i>	20
	<i>Cultural control.....</i>	20
	<i>Chemical control.....</i>	21

<i>Monitoring</i>	21
7.5 Mites	21
7.5.1 Redlegged earth mite	21
<i>Damage caused by RLEM</i>	23
<i>Managing RLEM</i>	23
7.5.2 Balaustium mite	26
<i>Damage caused by Balaustium mite</i>	27
<i>Management</i>	27
7.5.3 Blue oat mite	28
<i>Damage caused by BOM</i>	30
<i>Managing BOM</i>	30
7.5.4 <i>Bryobia</i> mite	32
<i>Damage cause by mite</i>	34
<i>Managing Bryobia mites</i>	34
7.6 Lucerne flea	34
<i>Damage caused by Lucerne flea</i>	36
<i>Managing Lucerne flea</i>	36
7.7 Cutworm	38
7.7.1 Damage caused by cutworms	41
7.7.2 Thresholds for control.....	41
7.7.3 Managing cutworm	41
<i>Biological</i>	42
<i>Cultural</i>	42
<i>Chemical</i>	42
7.8 Armyworm	42
7.8.1 Damage caused by armyworms	44
7.8.2 Thresholds for control.....	45
7.8.3 Managing armyworms	45
<i>Sampling and detection</i>	45
<i>Biological control</i>	46
<i>Cultural control</i>	46
<i>Chemical control</i>	46
7.9 Slugs and snails	46
7.9.1 Managing slugs and snails	49
7.10 Wireworms and False wireworms	53
7.10.1 False wireworms	53
<i>Biology</i>	55
<i>Damage caused by false wireworms</i>	55
7.10.2 True wireworm	56
<i>Biology</i>	57
<i>Damage</i>	57
7.10.3 Sampling and detection	58
7.10.4 Control	58

7.11	Plague locusts.....	59
8	Nematode management	
	<i>Key messages</i>	1
	<i>Cereal root disease management in Victoria and southern Australia</i>	1
8.1	Root-lesion nematode (RLN)	2
	<i>Key points</i>	2
8.1.1	Symptoms	4
	<i>Paddock</i>	4
	<i>Plant</i>	5
8.1.2	Soil testing	6
	<i>PreDictaB</i>	6
8.1.3	Varietal resistance or tolerance	7
8.1.4	Damage caused by RLN.....	7
8.1.5	Conditions favouring development.....	8
	<i>How long does it take to reduce Pt in soils?</i>	8
8.1.6	Thresholds for control.....	9
8.1.7	Management of RLN	9
	<i>Key points</i>	9
8.2	Cereal Cyst Nematode (CCN)	10
	<i>Key points</i>	10
	<i>The effect of plant hosts on populations of the cereal cyst nematode (Heterodera a Venae) and on the subsequent yield of wheat</i>	11
8.2.1	Symptoms and detection.....	12
8.2.2	Varietal resistance or tolerance	14
8.2.3	Damage caused by CCN.....	14
8.2.4	Management	14
8.3	Nematodes and crown rot.....	15
8.3.1	Management.....	16
	<i>Soil testing</i>	16
	<i>Varietal choice</i>	17
9	Diseases	
	<i>Key messages</i>	1
9.1.1	Tools for diagnosing cereal disease	2
	<i>Crop Disease Au App</i>	2
	<i>CropPro</i>	2
9.2	Ergot	3
9.2.1	Varietal resistance or tolerance	4
9.2.2	Damage caused by disease.....	4
	<i>Gangrenous ergotism of man and cattle</i>	4
	<i>Convulsive ergotism</i>	4
9.2.3	Crop symptoms	4
	<i>What to look for</i>	4

9.2.4	Conditions favouring development.....	5
9.2.5	Management of disease.....	6
	<i>Key points</i>	6
	<i>Strategies to reduce the risk of ergot infection</i>	7
	<i>Marketing options</i>	7
	<i>Alkaloids in Australian rye ergot sclerotia: implications for food and stockfeed regulations</i>	8
9.3	Take-all	8
	<i>Key points:</i>	8
9.3.1	Symptoms	10
	<i>What to look for</i>	10
9.3.2	Conditions favouring development.....	11
	<i>Hosts</i>	12
9.3.3	Managing take-all.....	12
	<i>Key points</i>	12
	<i>Take-all decline</i>	13
9.4	Rusts	13
9.4.1	Symptoms	14
9.4.2	Stripe rust (Yellow rust)	14
	<i>Stripe rust in southern Australia</i>	15
9.4.3	Leaf rust (Brown rust)	15
9.4.4	Stem rust (Black rust)	17
	<i>Stem rust in southern Australia</i>	18
9.4.5	Management of Rust.....	18
9.4.6	Integrated disease management of rusts and yellow leaf spot.....	19
	<i>Key points</i>	19
	<i>Breeding cereals for rust resistance in Australia</i>	21
9.5	Yellow leaf spot (Tan spot).....	21
9.5.1	Varietal resistance or tolerance	22
9.5.2	Damage caused by disease.....	22
9.5.3	Symptoms	22
9.5.4	Conditions favouring development.....	22
9.5.5	Management of disease.....	22
	<i>Minimising the risk of yellow leaf spot</i>	23
	<i>In-crop fungicides and timing</i>	23
9.6	Fusarium: Crown rot and FHB	23
	<i>Key points</i>	23
9.6.1	Update on the latest research.....	24
	<i>Take home messages</i>	24
9.6.2	Damage caused by Crown rot.....	25
9.6.3	Symptoms	25
9.6.4	FHB symptoms.....	27
9.6.5	Conditions favouring development.....	28

<i>Crown rot</i>	28
<i>FHB</i>	29
9.6.6 Management	29

13.3	Aeration during storage	22
13.3.1	Dealing with high moisture grain	22
	<i>Key points</i>	22
13.3.2	Aeration cooling	23
	<i>Key points</i>	23
	<i>Blending</i>	23
	<i>Seed viability</i>	23
13.3.3	Aeration drying	24

High airflow for drying	24
Ducting for drying.....	24
Venting for drying.....	25
Weather conditions for drying.....	25
Phase one of drying.....	25
Phase two of drying.....	25
Supplementary heating.....	25
Cooling after drying.....	25
13.3.4 Aeration controllers.....	26
13.4 Grain protectants for storage.....	26
13.4.1 <u>K-Obiol Combi</u>	27
13.4.2 Conserve On-farm	27
14 Environmental issues	
Key messages.....	1
14.1 Frost issues for Cereal Rye.....	1
Key points	1
14.1.1 Diagnosing stem and head frost damage in cereals.....	3
What to look for	5
New insight in frost events and management.....	7
Guidelines for reducing frost risk and assessing frost damage.....	10
14.1.2 Managing frost risk	11
Key points	11
Farm management planning tactics.....	12
Frost zone management tactics.....	12
Diversity the key to balancing frost and heat stress risks.....	15
Post-frost event management tactics.....	16
Useful tools.....	18
National Frost Initiative.....	19
14.2 Waterlogging/flooding issues for cereal rye	19
Key points	19
Comparison of waterlogging and drought tolerances among winter cereals.....	20
Where does waterlogging occur?.....	21
Crop production in the high rainfall zones of southern Australia— potential, constraints and opportunities.....	21
Identifying problem areas	22
14.2.1 Symptoms and causes.....	22
What to look for in the paddock.....	22
What to look for in plants	23
How can waterlogging be monitored?.....	24
Other impacts of waterlogging and flood events	24
14.2.2 Managing waterlogging	25
Key points	25
Drainage problems after flooding.....	25
Irrigation after waterlogging.....	25
Ways to improve drainage.....	25

Choice of crop species 26

Seeding rates 26

Nitrogen fertiliser 26

14.3 Other environmental issues for cereal rye **26**

14.3.1 Drought 26

The influence of the autumn and spring drought on the development of winter rye and barley 27

Managing drought 28

14.3.2 Heat stress 28

Managing heat stress 30

14.3.3 Salinity 30

How salinity affects the emergence, growth, yield and quality of rye 31

Symptoms 31

Management strategies 33

15 Marketing 1

Key messages 1

15.1 Links to industry boards **1**

15.1.1 Mackillop Farm Management Group 1

Objectives 1

15.1.2 Riverine Plains 2

15.1.3 Southern Farming Systems (SFS) 2

15.1.4 Tasmanian Farmers and Graziers Association (TFGA) 2

15.1.5 Mallee Sustainable Farming (MSF) 3

15.1.6 Hart Field Site SA 3

15.1.7 Birchop Cropping Group 3

15.1.8 Victorian No-Till Farming Association 3

15.1.9 South Australian No Till Farming Association (SANTFA) 4

15.2 Selling principles **4**

15.2.1 Be prepared 4

Expand the sales window 5

When to sell 5

How to sell? 5

15.2.2 Establishing the business risk profile—when to sell 5

When does a growers sell their grain? 6

15.2.3 Production risk profile of the farm 6

You can't sell what you don't have 6

15.2.4 Farm costs in their entirety, variable and fixed costs (establishing a target price) 7

Don't lock in a loss 7

15.2.5 Income requirements 8

Don't be a forced seller 8

Summary 10

15.2.6 Managing your price—how to sell 11

<i>Methods of price management</i>	11
<i>If increasing production risk, take price risk off the table</i>	11
<i>Separate the pricing decision from the delivery decision</i>	11
<i>Fixed price</i>	11
<i>Floor price</i>	12
<i>Floating price</i>	12
<i>Summary</i>	13
15.2.7 Ensuring access to markets	13
<i>Storage and logistics</i>	14
<i>Harvest is the first priority</i>	14
<i>Storage is all about market access</i>	14
<i>Cost of carrying grain</i>	15
<i>Carrying grain is not free</i>	16
<i>Summary</i>	16
15.2.8 Executing tonnes into cash	16
<i>Set up the tool box</i>	16
<i>How to sell for cash</i>	16
<i>Counterparty risk</i>	19
<i>Seller beware</i>	19
<i>Relative values</i>	19
<i>Sell valued commodities, not undervalued commodities</i>	19
<i>Contract allocation</i>	20
<i>Don't leave money on the table</i>	20
<i>Read market signals</i>	20
<i>Sell when there is buyer appetite</i>	20
<i>Summary</i>	20
<i>Separate the delivery decision from the pricing decision</i>	20
