

BOORT  
VICTORIA  
THURSDAY 14  
JULY 2022

# GRAINS RESEARCH UPDATE

## Boort Memorial Hall, Godfrey Street, Boort

9.00 am to 1.00 pm followed by lunch (doors open at 8.30 am for a 9.00 am start)

### Topics

- ▶ **A strategic approach to managing paraquat and glyphosate resistance**  
Resistance levels along fence lines and check banks can prove challenging to manage. Sam explains how a strategic approach to weed control can help optimise the longevity of paraquat and glyphosate.
- ▶ **Emerging challenges for managing blackleg this season**  
Join Angela Van de Wouw from the University of Melbourne for a presentation on the latest research outcomes regarding blackleg management in canola. Discover how blackleg will impact upon managing your canola crop this season.
- ▶ **Cereal disease to be on the lookout for this season**  
With Planet<sup>db</sup> barley and Scepter<sup>db</sup> wheat being popular varieties for the region net form net blotch and powdery mildew are an emerging threat. Join Mark and Hari as they explore the key cereal disease implications for the region this season.
- ▶ **Building strong agronomic foundations for canola**  
Make the most of high canola prices this season by developing strong agronomic foundations. Damian provides an overview of the key findings from local based irrigated canola trials.
- ▶ **The economics of effective fertiliser budgeting**  
With fertiliser prices on the rise, it is important to revisit and reinforce the value of nitrogen. Lee covers off on the economic value of nitrogen this season in relation to current grain prices.
