

# Pigeonpea Field Walk

**Join us at our pigeonpea trial site at Tosari Crop Research Centre to inspect new pigeonpea research trials.**

The Department of Agriculture and Fisheries (DAF) and the Grains Research and Development Corporation (GRDC) are investing in the evaluation of new pigeonpea experimental lines at field sites in southern and central Queensland in summer 2023-24.

DAF is also conducting additional research on pigeonpea agronomy and control of weeds and insects in pigeonpea crops.

Our target is to build a new pigeonpea industry in Queensland, providing growers with a profitable new broadacre summer legume crop, and developing new export markets to Asia, building on the success of mungbean and chickpea.

Interested growers and agronomists can see pigeonpea in the field and understand the opportunities and issues with growing pigeonpea.

**Date:**

**Fri 1 March 2024**

**Time:**

**9.00am – 10.30am**

**Address:**

**Tosari Crop  
Research Centre,  
1149 Millmerran  
Leyburn Road  
(Cnr Yarramalong  
Rd), Tummaville
