

Northern Region Harvester Discussion Forums

Measuring Harvest Loss - Harvest Weed Seed Control - Harvester Fire Prevention

Grain growers are invited to participate in one of a series of 2021 GRDC Harvester Forums to be held in the lead-up to harvest 2021.

Hear from industry experts and local growers on the integration of harvest weed seed control (HWSC) options, harvester fire prevention and accurate measurement/management of harvest losses.

The half-day forums hosted by FarmLink will bring together harvester specialists, industry experts and researchers to discuss preventable harvester grain losses and how to measure these, improvements in efficiency and output, methods of harvest weed seed control (HWSC), the prevention of harvester fires and calibrating harvester technology.

Clermont Thursday, September 9 | 12.30pm-4.30pm

Venue - Grower property details will be provided upon registration

Forum leaders

- Dr Michael Walsh (Sydney University)
- Ben White (Kondinin Group)
- Brett Asphar (Seed Terminator)
- Peter Broley (Primary Sales)

Alongside demonstrations by industry representatives and manufacturers

Program

- Understanding the impact of harvest loss, how to measure it and how to change your harvester to reduce losses.
- HWSC latest information, sharing how to set-up for effective HWSC using mills systems (iHSD, Seed Terminator, SCU) chaff decks & chaff lining.
- Reducing the risk of harvester fires
- Improving harvester capacity and efficiency
- Managing Harvest operations, productivity, and economics
